

Missouri

# HIGH-PRIORITY UNFUNDED NEEDS

DRAFT

Aug. 2023

# INTRODUCTION

## Message from Missouri Department of Transportation Director Patrick McKenna

Missouri's transportation system is a tremendous asset made up of 33,808 miles of roads and 10,424 bridges. The system ranks among the largest for any state in the nation. On average, Missouri drivers pay \$32 per month in fuel taxes and fees to fund the maintenance and improvements to this asset. Over the last 10 years, Missourians have invested in 4,430 projects totaling \$10.8 billion to maintain and improve the system. Looking forward, \$10.4 billion is estimated to be available for needs over the next five years for additional improvements. Including design and project development costs, the FY 2024-2028 Statewide Transportation Improvement Program totals nearly \$14 billion, the largest in state history, with more than 1,500 projects.

Last year, working with the Metropolitan Planning Organizations and Regional Planning Commissions, we moved 14 needs worth \$3 billion from the unfunded list to the FY2024-2028 STIP. This included a historic \$2.8 billion investment in the widening and reconstruction of Interstate 70 using General Revenue funds and bonds.

As we start our annual planning process with our regional partners, we know there are still unfunded needs. MoDOT's publication, *The Citizen's Guide to Transportation Funding in Missouri*, identifies \$1.1 billion in annual unfunded transportation needs. The challenge is determining the optimal needs to fund that provide the greatest return on investment to taxpayers.

For this year's unfunded priorities, we've generated lists of \$4.7 billion in road and bridge needs in three tiers. Tier one includes \$552 million and includes needs we could accomplish in the time of the current five-year STIP as federal and state funding is available. These needs have more refined estimates. Tier two is worth \$2.1 billion and includes needs beyond the current STIP timeframe with broader estimates. Tier three includes \$2 billion of needs also beyond the current STIP timeframe with broader estimates. In addition, DOT staff worked with the planning partners to identify \$1 billion in multimodal needs.

The High Priority Unfunded Needs list provides direction for future years' STIP development. The collaboration across the state is critical to get future needs in the right tier of prioritization so MoDOT is ready to respond as federal and state transportation funding becomes available.

# INTRODUCTION

Missourians have repeatedly communicated the number one goal for MoDOT is to take care of the existing system of roads and bridges, so the majority of taxpayer dollars for transportation are invested in asset management projects. Current funding levels are only sufficient to maintain the transportation system in its current condition leaving many transportation needs unfunded. While the latest Citizen's Guide identifies \$825 million in annual transportation needs, MoDOT has applied inflation bringing this number to \$1.1 billion which totals \$11 billion over 10 years.

# INTRODUCTION

## Total High-Priority Unfunded Needs Delivered

\* Note: No annual update to the STIP

# INTRODUCTION

**1. Establish a vision** – MoDOT’s vision for its transportation future is best captured by the five goals established by Missourians in the Long-Range Transportation Plan. In priority order, they are: 1) Take care of the transportation system; 2) Keep all travelers safe; 3) Invest in projects that spur economic growth and create jobs; 4) Give Missourians better transportation choices; and 5) Improve reliability and reduce congestion.

**2. Identify Needs** – Metropolitan Planning Organizations (MPO) and Regional Planning Commissions (RPC) identify needs in their respective regions through their planning processes.

**3. Prioritize Needs** – MoDOT Districts offices work with MPOs and RPCs to annually prioritize regional needs, collectively. This requires multiple planning entities within a MoDOT district to work collectively to create priorities among all needs identified, regardless of location. Safety, traffic volume, asset condition data are used to help select the highest priorities within a MoDOT district boundary.

**4. Unfunded Needs List** – The prioritized needs are compiled into a list and taken to the Missouri Highways and Transportation Commission (MHTC). The list includes multiple tiers of needs. The first tier represents priorities which could be delivered with additional funds in the Statewide Transportation Improvement Program horizon (five years).

**5. Identify and estimate specific improvements** – After prioritization, needs are analyzed to determine the most complete, efficient, and cost-effective transportation improvements. This is also known as scoping.

**7. Communicating Outcomes** – Results are conveyed back to MPOs and RPCs as progress is made. Projects committed to the STIP are removed from the Unfunded Needs list as part of the next year’s prioritization process.

**6. Programming Improvements** – MoDOT, MPOs, and RPCs, then collaboratively determine which high priority needs should be placed into the STIP as a commitment to construct a project. Funding availability, project timing, and agency coordination are considered in determining which needs become projects in the STIP and these decisions are made collaboratively among all RPCs and MPOs in a MoDOT District. In MPO areas, these same projects must be included in MPO’s Transportation Improvement Programs by their respective Boards’ of Directors.

# INTRODUCTION

\$125 million

Improve  
Bridge  
Conditions

**Improve Bridge Conditions** – Missouri has 10,424 bridges of varying sizes. Currently, 823 bridges, or 8%, are in poor condition. Investing an additional \$125 million each year for ten years would decrease the number of poor condition bridges to approximately 300, or 3% of the total bridges.

\$70 million

Improve  
Road  
Conditions

**Improve Road Conditions** – Missouri's state highway system consists of approximately 34,000 miles, the seventh largest in the nation. The majority of travel occurs on the 5,553 miles of interstate and major routes – 89% of these routes are in good condition. Minor routes account for 17,538 miles of the system – 81% of these routes are in good condition. The low volume routes, which carry less than 400 cars per day, account for 10,717 miles – 74% of these routes are in good condition. Investing an additional \$70 million each year for ten years would preserve the current condition of interstate, major and minor routes and improve the condition of low volume routes from 74% to 80% good condition.

\$115 million

MoDOT  
Maint. &  
Operations

**MoDOT Maintenance & Operations** – MoDOT employs 3,000+ field employees throughout the state to operate and maintain the transportation system. Services include pavement repairs, winter operations and mowing roadsides. To continue the current level of service, an additional investment of \$115 million per year is needed to keep pace with inflationary cost increases.

# INTRODUCTION

**Invest in projects that increase economic growth and improve safety** – These projects include new interchanges, adding shoulders with rumble stripes and adding lanes to the current system. In addition to congestion reduction and economic growth benefits, all of these projects would improve safety so fewer fatalities and serious injuries occur. An additional investment of \$330 million per year would allow MoDOT to begin meeting those needs.

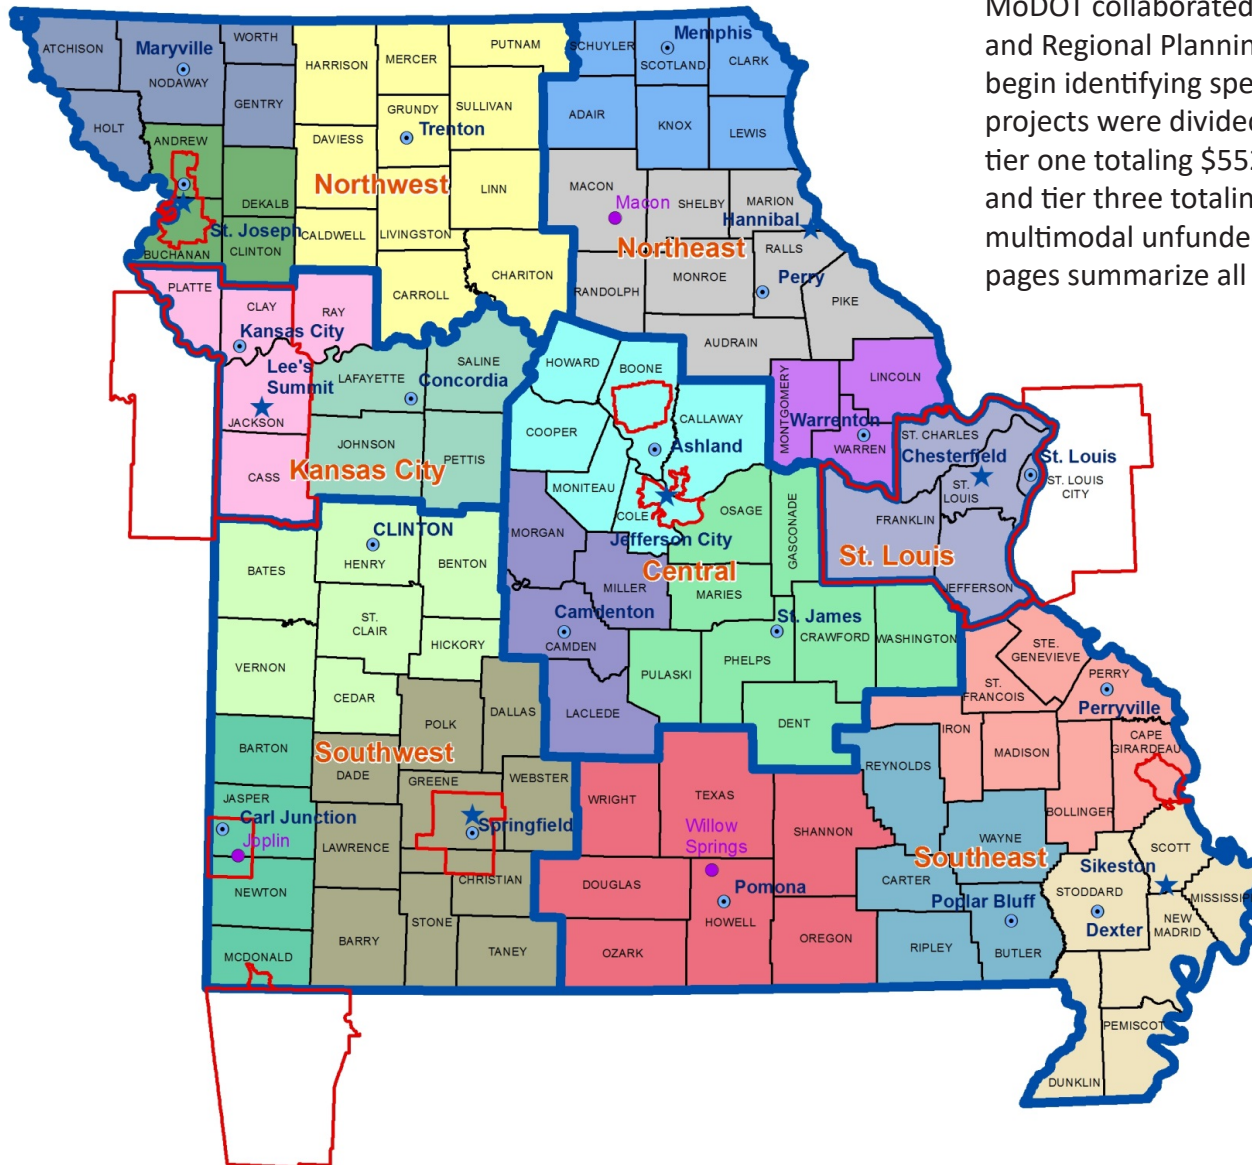

**Major interstate reconstruction** – The nation’s interstate system is over 60 years old, and Missouri’s interstates were built with a 20-year life expectancy. Missouri’s interstates need to be reconstructed with added capacity to reliably handle mounting levels of traffic, especially long-haul trucks. An additional \$360 million per year would allow MoDOT to begin tackling this long overdue improvement.

**Improve multimodal transportation options** – Many Missourians rely on non-highway modes of transportation; however, the state currently invests very little money toward those needs. Missouri’s transit systems, railroads, ports, waterways, airports and bicycle/pedestrian facilities could begin to see much needed improvements with an annual investment of \$100 million each year.

# INTRODUCTION

MoDOT collaborated with Metropolitan Planning Organizations and Regional Planning Commissions across the state to begin identifying specific projects within each category. The projects were divided into three tiers – the highest priority tier one totaling \$552 million, tier two totaling \$2.1 billion and tier three totaling \$2.0 billion. An additional \$1 billion of multimodal unfunded needs were also identified. The following pages summarize all of these unfunded needs.

- MoDOT District
- Regional Planning Commission
- Metropolitan Planning Organization
- ★ MoDOT District Office
- Regional Office
- RPC Office

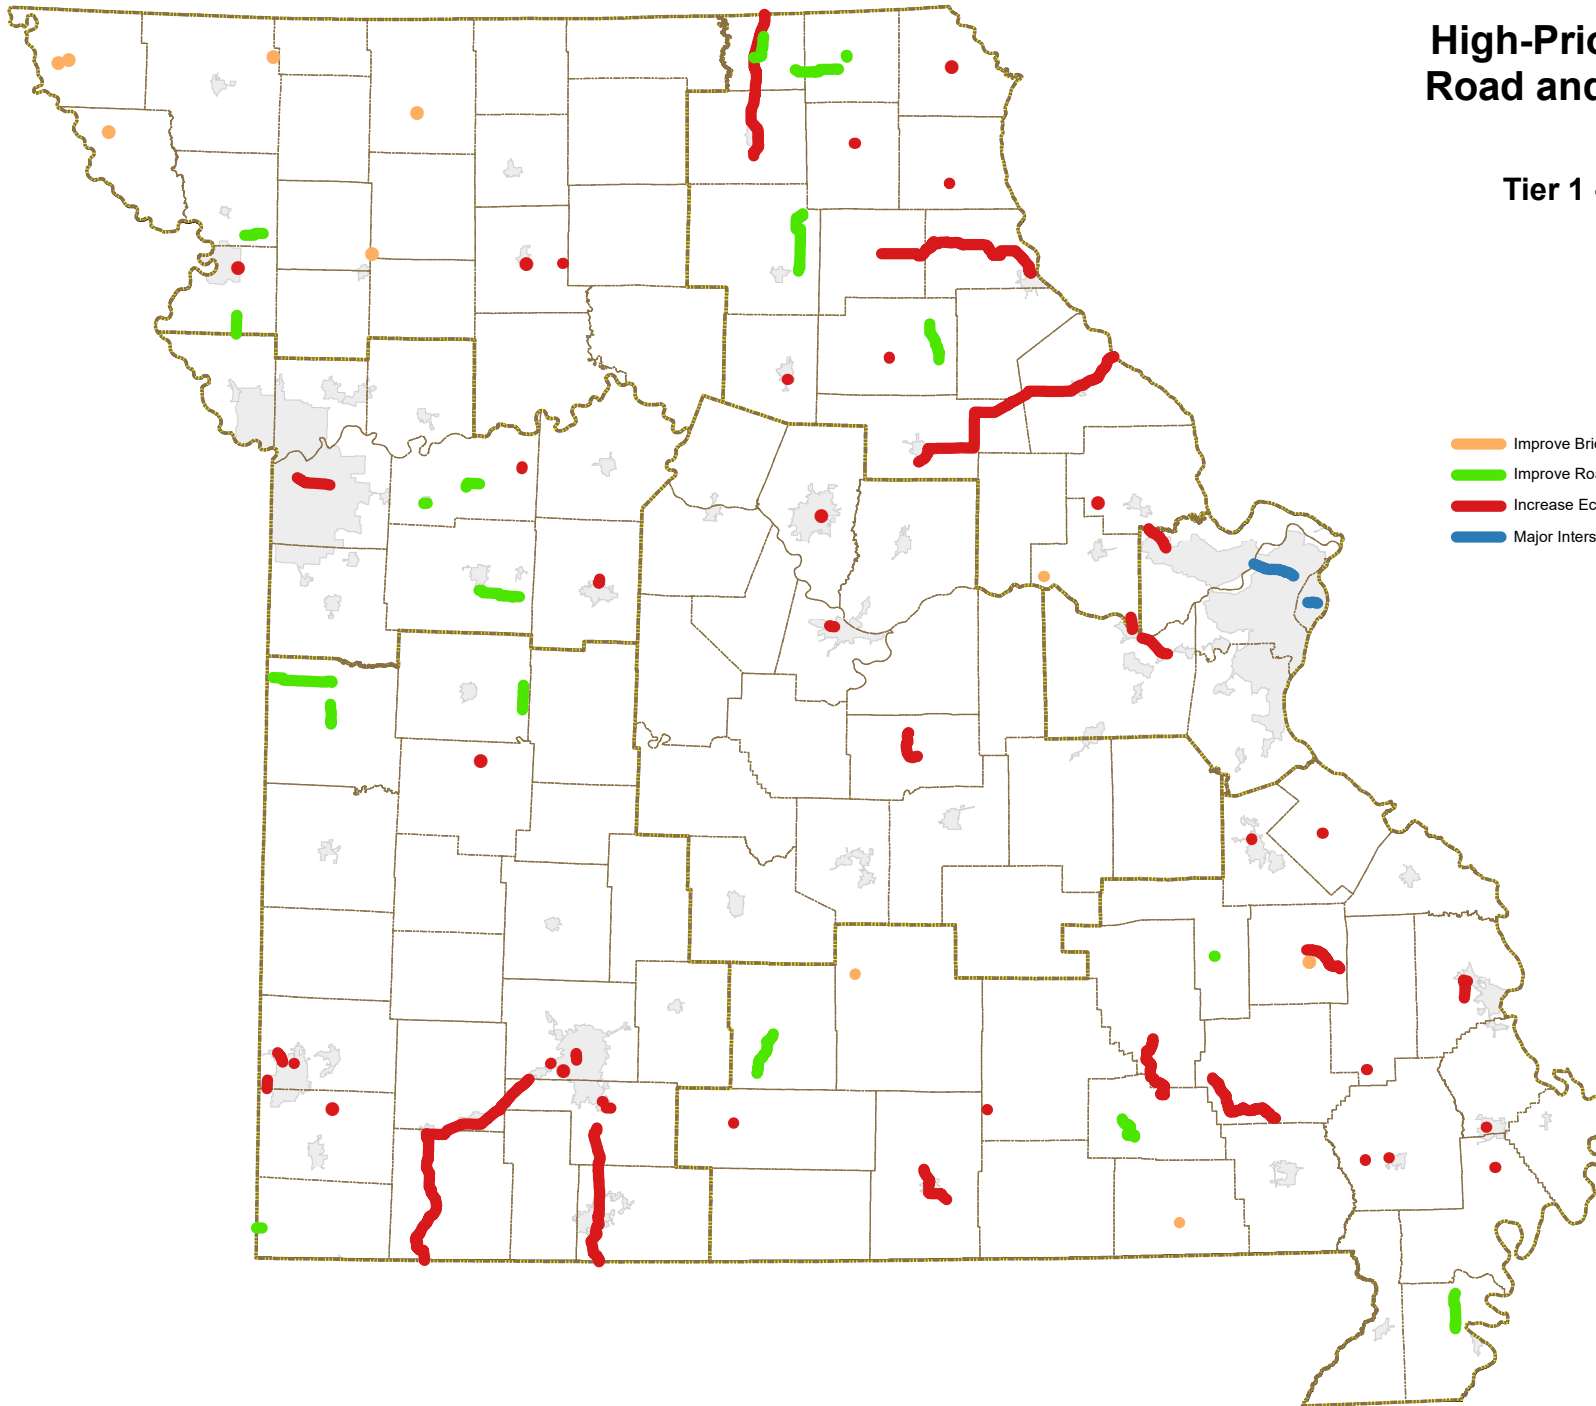

# High-Priority Unfunded Road and Bridge Needs

Tier 1 - \$ 552 Million

**DRAFT**

- Improve Bridge Conditions
- Improve Road Conditions
- Increase Economic Growth and Improve Safety
- Major Interstate Reconstruction
