

ADDENDUM NO. 1

This addendum is issued as part of the following request for qualifications:

**I-70 NEPA Re-evaluation
SIU 2, SIU 3, SIU 5 and SIU 6 of the Tier II Improve I-70 documents
Job Numbers: ST0016, ST0017, ST0021 and ST0018**

Clarification #1

MoDOT hopes to select a team(s) by the end of June with the expectation of completing the scope of services within a year of the notice to proceed. Consultant teams will be evaluated based on their qualifications to complete the NEPA re-evaluation of the four sections of independent utility on the I-70 corridor and the team's approach to meeting the accelerated schedule. Teams should focus their letter of interest on these services specifically. Any additional preliminary investigative work is optional and may not be needed outside of the NEPA re-evaluations. Completed Improve I-70 documents can be found at [Completed Improve I-70 Studies | Missouri Department of Transportation \(modot.org\)](https://www.modot.org/Completed-Improve-I-70-Studies).

The scope of the proposed work will not include Owner's Engineer (OE) services therefore consultants and subconsultants providing these services will not be excluded from participating in competition for future Alternative Project Delivery projects on these sections of I-70. Any additional preliminary investigative work will be limited to ensure there are no potential conflicts that would disqualify firms from future competition.

These projects will be centrally led with assistance from our local district staff. A project lead has not been determined at this time.
