

# IMPROVE I-70 ROCHEPORT TO COLUMBIA

## PARIS ROAD AND BUSINESS LOOP INTERSECTION

### MODOT & CITY COORDINATION

The purpose of these improvements is to allow Business Loop 70 to be used as an incident by pass route. MoDOT is aware of the City of Columbia's plans to pursue railbaking a 2.5 mile section of the COLT Railroad to convert the unused track into a potential trail or greenway.

MoDOT is in continued discussions with the city regarding these plans. The proposed plans for the Paris Rd. and Business Loop intersection for the Improve I-70: Rocheport to Columbia project does **not** create a barrier to the city's plans. Should the city move forward with this project, MoDOT plans to ensure the intersection has signal controlled crosswalks for vulnerable road users.
