

# Improve I-70 Kansas City

Industry Meeting, July 27, 2023

## Questions & Answers

Comment Number	Question	MoDOT Response
1	Will this project follow the streamlined RFQ/RFP process that the statewide Improve I-70 project/program is following?	No, this project will follow MoDOT's standard solicitation process.
2	Will the new Royals stadium location influence the corridor?	A couple of sites are currently being considered for a potentially relocated Royals stadium. The site, located west of the project in the downtown area, could have potential impacts. We are currently coordinating with Royals on this.
3	Are there plans for a carpool lane or express lane?	There are no plans for a carpool lane or an express lane with the project.
4	Will there be additional pedestrian and bike access and/or plans to repair and improve current pedestrian and bike access?	The existing sidewalk facilities along streets crossing I-70 are generally in poor condition and in need of replacement. Two pedestrian bridges crossing I-70 are to be replaced with the project. A project goal is to address and improve these facilities. We are coordinating with the City to accomodate existing and future bike and pedestrain facilities.
