

**SERVICES PROVIDED BY THE COMMISSION**

A. The CONSULTANT shall be responsible for completing all roadway design work for this project, except for the following items to be provided by the COMMISSION:

- a. Make available to the Consultant the necessary plans, forms, specifications, copy of the contract and other documents to permit the Consultant to perform the prescribed duties.
- b. All off site inspections including concrete, steel, aggregates, signs and all other materials customarily tested and inspected off site by the Engineer.
- c. Shop drawing review.
- d. Resolve and decide differences in interpretation of the contract requirements between the Consultant and Contractor.
- e. AASHTOWare Project Training if needed.
- f. Approve change orders and pay estimates.
- g. Lidar Survey of entire project area (Pick-up work will be needed only)
- h. "As-built" plans for prior State highway improvements within the project limits.
- i. Traffic volumes for construction and design year traffic, including turning movements (if applicable).
- j. Pavement and shoulder design – thickness and type.
- k. Electronic copies of all necessary special sheets and standard format sheets will be provided in DGN format. MoDOT standard plans, Missouri Standard Specifications for Highway Construction, standardized job special provisions, and Engineering Policy Guide (EPG) are available at <http://www.modot.org/business>.
- l. Seeding and fertilizing application rates.
- m. Contract completion date.

B. The CONSULTANT shall proceed with final design and preparation of detailed plans in accordance with the data approved or furnished by the COMMISSION which will meet with the general standards adopted by AASHTO and approved by the Department of Transportation as provided by Title 23, United States Code, Section 109(b).
