DRIVING THE ROUNDABOUT

As you approach the intersection, look left. Yield to all lanes of traffic in the roundabout. Once you safely enter the roundabout, follow the signs and pavement markings and do not stop for vehicles waiting to enter the roundabout.

Commercial vehicles can navigate the roundabout in nearly the same manner as a passenger vehicle. However, large trucks will sometimes need to utilize the truck apron—a raised portion in the center of the roundabout to aid tractor trailers in completing turns.

If an emergency vehicle approaches before you enter the roundabout, pull to the right and let the emergency vehicle pass. If an emergency vehicle enters the roundabout while you are already circulating, do not stop. Motorists need to continue through the roundabout and pull off onto the shoulder of the roadway immediately after exiting.
