**Missouri Department of Transportation  
Missouri's Local Program Advisory Committee  
Local Public Agency On-Call List**

**Re: Application for Multimodal Planning/Systems and Facilities Design -  
Local Public Agency On-Call List**

**Dear Advisory Committee:**

Lambert Engineering & Surveying, LLC would first like to take this opportunity to thank you for your invitation to submit a professional engineering proposal for the Local Public Agency On-Call List for the 2026-2029 years.

Lambert Engineering & Surveying has been in business since September 11, 2001 and was created a limited liability company on January 11, 2016. Lambert Engineering & Surveying, LLC is very knowledgeable in engineering multimodal planning/systems and facilities design. Furthermore, this company has been performing port planning and infrastructure design for the New Madrid County Port Authority over the past eighteen years. We are very familiar with the Federal Highway Guidelines as well as the Missouri Department of Transportation Local Public Agency Manual and their requirements. We also have worked with other federal funded grants such as Delta Regional Authority Grants and Missouri Department of Economic Development Grants (CDBG) along with state funds such as the Capital Improvement Program (CIP). Some of these projects we have planned, designed and inspected under grant funding include the American Recovery and Reinvestment Act of 2009 and the Missouri Highways and Transportation Commission Capital Improvement Funds. The planning, infrastructure design and inspection projects include railroad improvements, domestic waterline, sanitary sewer, sheet piling, a new harbor, warehousing, storm sewer & road improvements.

The principal of the firm is Chris W. Lambert, Registered Professional Engineer and Registered Professional Land Surveyor, both in the State of Missouri. Mr. Lambert also has a Bachelor of Science Degree and a Master of Science Degree, both from the Missouri University of Science and Technology. Mr. Lambert has performed the planning, infrastructure design & inspection
