Missouri's Local Program Advisory Committee
Local Public Agency On-Call List**

Re: Application for Roadway Design - Local Public Agency On-Call List

Dear Advisory Committee:

Lambert Engineering & Surveying, LLC would first like to take this opportunity to thank you for your invitation to submit a professional engineering proposal for the Local Public Agency On-Call List for the 2026-2029 years.

Lambert Engineering & Surveying has been in business since September 11, 2001 and was created a limited liability company on January 11, 2016. Lambert Engineering & Surveying, LLC is very knowledgeable in professional engineering design of road/street improvement projects. In fact, this company has been engineering designing road/street projects for the past twenty years. We are very familiar with the Federal Highway Guidelines as well as the Missouri Department of Transportation Local Public Agency Manual and their requirements. We also have worked with other federal funded grants such as Delta Regional Authority Grants and Missouri Department of Economic Development Grants (CDBG). Some projects we have completed under grant funding include Transportation Enhancement Program, Safe Routes to School Program, American Recovery and Reinvestment Act of 2009 and the Missouri Highways and Transportation Commission Capital Improvement Funds. The following page includes some of the roadway/street projects we have completed in the last twenty years.

The principal of the firm is Chris W. Lambert, Registered Professional Engineer and Registered Professional Land Surveyor, both in the State of Missouri. Mr. Lambert also has a Bachelor of Science Degree and a Master of Science Degree, both from the Missouri University of Science and Technology. His master emphasis was in concrete design which makes him extremely qualified in concrete street/road design. Mr. Lambert has designed the past road/street projects for Lambert Engineering & Surveying, LLC and will be the one who will continue to design these projects.
