- Chrome
- Safari – and more

A Note For Those With Hazardous Waste and Waste Tire Permits

A plug-in known as Java is required to complete Haz Waste and Waste Tire transactions online.

Visit Java.com to download the most recent version. JavaScript (active scripting setting) must be enabled in the browser.

From the Internet Explorer menu, select TOOLS, then INTERNET OPTIONS.

Click the SECURITY tab, then INTERNET zone, then CUSTOM LEVEL.

Scroll to find SCRIPTING in the SETTINGS box. Click on ENABLE, then click OK to save.

Please note that the JAVA software used to complete these transactions is not compatible with app-based devices such as tablets and mobile phones. These transactions require the use of **BOTH** the Internet Explorer browser (only) and a program-based computer, such as a PC or Apple Mac.
