

MOVERS: Price Quote Requests

Description and Benefit

Transitioning Price Quote Requests (PQFs) from an email-based process to the MOVERS Solicitations system has streamlined vehicle procurement for the Office of Administration's Division of Purchasing. Previously, managing multiple PQFs across Outlook folders was time-consuming, error-prone, and lacked visibility. MOVERS centralizes all PQF activities—from request to award—into one platform, eliminating redundant communication and reducing administrative burden. Procurement staff can easily access vendor responses, documents, and questions without searching through emails, while automatic bid tabulations provide clear, standardized pricing for quick review. This innovation improves accuracy, transparency, and efficiency, allowing staff to focus on decision-making rather than tracking information.
