

ST. LOUIS CITY LIMITS TO INTERSTATE 55 ROUTE 100 (MANCHESTER/CHOUTEAU) RESURFACING AND SAFETY IMPROVEMENT PROJECT

The Missouri Department of Transportation will resurface Route 100 (Manchester/Chouteau) in the City of St. Louis in 2025. The new pavement provides an opportunity to make changes to what the roadway looks like. Now is the right time to get the community's input so it can be part of a new design that will improve safety for all users.

The project area extends nearly 7 miles and includes 27 signals.

SEEKING A SAFER ROUTE 100 (MANCHESTER/CHOUTEAU)

Crash rates in the project area exceed the statewide average for similar roadways and include 36 serious injury and fatal crashes in the last five years.

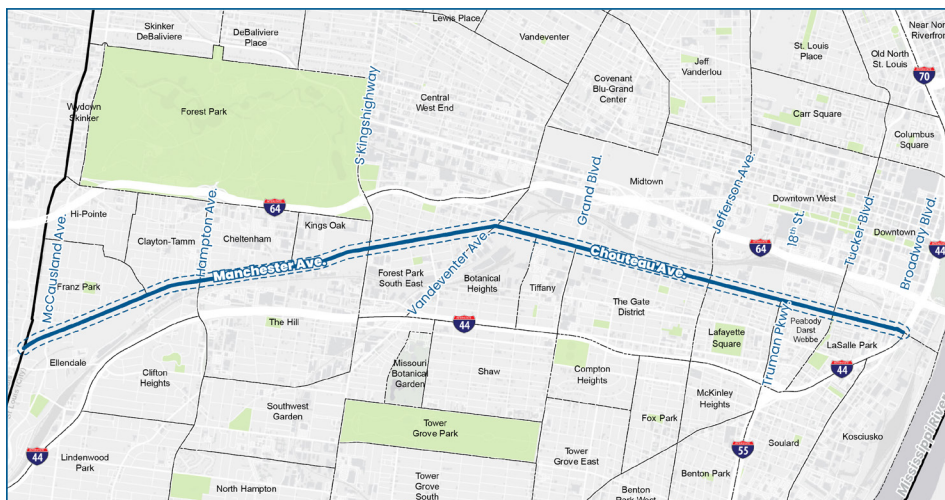

INCLUDING

The project will:

1. Resurface Route 100 (Manchester/Chouteau) in the city of St. Louis.
2. Work with the community to identify safety concerns along the corridor and determine possible solutions.
3. Work with local partners to address safety concerns during the resurfacing project.

Route 100 starts as Manchester Avenue between the St. Louis City limits and South Vandeventer Avenue, and continues on Chouteau to the east, where it ends at I-55.

SCHEDULE

During this project, we want to hear from you! There are several opportunities to share your insights as we move through the early portion of the project.

FALL/WINTER 2023

Understand community concerns

- Focus Group #1
- Public Meeting #1

WINTER/SPRING 2024

Evaluate Potential Safety Strategies

- Focus Group #2
- Public Meeting #2

SPRING 2024

Review Selected Safety Strategies

- Focus Group #3

SUMMER/FALL 2024

Preliminary Design

- Present Preliminary Design for Comment

2025 (ANTICIPATED)

Construction
