MoDOT will resurface Route 100 (Manchester/Chouteau) in 2025. How can we make the roadway safer as we install new pavement? Community input is needed to understand safety concerns along the corridor and determine possible solutions.

We want to hear from you!

At this meeting, you will:

- Learn about crash rates on the corridor which are higher than average for this type of road
- Share what you know about challenges for drivers, pedestrians, and cyclists
- Talk to the project team
