

# ROUTE N EXPANSION (St. Charles County)

MoDOT and St. Charles County are working together on improving Route N from Route Z on the west to I-64 interchange on the east. This effort began in late 2023 with preliminary design completion anticipated by February 2026.

## PROJECT AREA

Route N from Route Z on the west to the I-64 interchange on the east in western St. Charles County.

The continued growth in western St. Charles County has caused significant increases in both local and regional traffic along Route N west of I-64. The purpose of the Route N Expansion is to improve access and safety, reduce congestion, improve pedestrian connectivity, and plan for future growth.

Proposed features include:

- Additional lanes in each direction
- Increased intersection capacity
- Shoulder, roundabouts, green space buffer, improve curves
- Shared-use path, sidewalk connections, traffic calming
- Median divided
- Manage access points

PROJECT  
WEBSITE

# SCHEDULE

The project was developed through collaborative and inclusive engagement with the public. Several opportunities for engagement were provided.

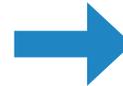

- **Spring/Early Summer 2024**  
Community and Technical Advisory Group (CAG) and (TAG) Meetings
- **Summer 2024**  
Evaluate Conceptual Alternatives  
Met with local officials and school representatives.
- **Winter 2024/2025**  
Conceptual Design Complete  
Public Meeting
- **Summer/Fall 2025**  
Gather input for the preliminary design
- **February 2026**  
Preliminary Design Complete

Community feedback is actively shaping potential corridor solutions. We used findings to shape a corridor plan reflecting both technical priorities and community values.

## What We've Heard

- Strong community desire to improve safety along Route N.
- Specific concerns about safety near schools and problem intersections.
- Widespread concerns about increasing traffic volumes and speeding.
- Identified need for better pedestrian and bike infrastructure.
- Desire for grass medians and green space.
- Better access management.

## Route N Corridor Objectives

- Reduce congestion and delays
- Improve access and connectivity
- Improve safety for all users
- Accommodate bikes and pedestrians
- Control access along the corridor
- Plan for growth and development
