Outdoor Advertising Rules and Regulations

The Missouri Department of Transportation (MoDOT) is responsible for regulating off-premises outdoor advertising adjacent to controlled travelways; which include the National Highway System, the interstate system, and highways classified as Federal Aid Primary as of June 1, 1991. Off-premises signs located along these controlled travelways are required to obtain an outdoor advertising permit from MoDOT. On-premises signs are not required to meet the permit requirements or obtain a permit from MoDOT.

Missouri’s rules and regulations regarding the control of outdoor advertising are located in Sections 226.500 to 226.600, RSMo and 7 CSR 10-6.

Outdoor advertising structures may not be accessed or maintained from the state right of way. Additionally, these structures may not be located on or overhang onto state right of way.

Application
An Application for Permit to Erect and/or Maintain Outdoor Advertising must be submitted prior to the erection of outdoor advertising. The application must be completed in its entirety, notarized, and submitted to the appropriate outdoor advertising area office along with the required documentation, and a check or money order for $200 payable to the “Director of Revenue- Credit State Road Fund” (if applicable).

Upon receipt of the application, a site inspection is performed to determine compliance. If approved, the permit is issued and the applicant has two years to erect the sign. Applicants shall contact their local county and municipality regarding local outdoor advertising ordinances.

If the permit is denied, the application and fee will be returned to the applicant. The applicant may request an informal hearing to review the denial.

Permit Requirements
The maximum size for outdoor advertising signs is 800 square feet, with a maximum length of 72 feet and height of 30 feet. Two displays are allowed side by side, but not stacked one above another. There are no above grade height restrictions.

Minimum spacing between a proposed sign location and a permitted sign on any controlled travelway is 1400 feet as measured on the same side of the travelway.

In unzoned areas or areas zoned commercial or industrial, the proposed sign location must be located within 750 feet of a visible and recognizable commercial or industrial activity on the same side of the travelway.

The facility of the qualifying commercial or industrial activity must be affixed to a foundation with an enclosed area of 200 square feet or more, have approved access, normal utilities, identification such as an on-premises sign, necessary business licenses, and sufficient inventory. The business may not be located in a residence; and must be in active operation a minimum of 180 days and meet all business requirements before an outdoor advertising permit can be issued. Additionally, an owner or employee must be present a minimum of 20 hours per week during posted business hours.

Missouri Outdoor Advertising Rules and Regulations Brochure
Sign Construction
The sign must be erected within two years from the date the permit was issued in accordance with the outdoor advertising rules and regulations, and as prescribed in the original permit application. Proposed modifications must first be submitted in writing and approved by the area permit specialist.

Maintenance
Permit owners are responsible to keep informed of any changes regarding outdoor advertising rules and regulations and maintain their signs in accordance to the rules and regulations. A complete list of state rules and regulations regarding billboard maintenance can be viewed online at www.modot.org/business/Outdoor_Advertising.

Nonconforming Status
A sign is classified as nonconforming when it fails to comply with current outdoor advertising rules and regulations. Reasonable maintenance and repair of a nonconforming sign is permissible; however, cannot be relocated, rebuilt or enlarged from the size it was on the day it became nonconforming pursuant to 7CSR 10-6.060 of the State Control of Outdoor Advertising Regulations. Additionally, you may not add lights, raise or lower the height of the sign, change the mode of advertising to trivision, digital or other changeable message sign, or add to the stabilization of nonconforming signs.

Repair of any deteriorated or damaged nonconforming sign after the date the sign becomes nonconforming is prohibited. A deteriorated or damaged nonconforming sign is a sign which needs or requires the replacement of 50% or more of the poles or vertical supports.

Permit holders should contact their area permit specialist prior to making changes to a permitted billboard structure.

Cutout and Extensions
A cutout or extension may be added to a structure for a period of time no more than three years or the term of the display contract, whichever is the shortest. After an outdoor advertising structure has had a cutout or extension for that time period, a cutout or extension cannot be placed on that structure for a period of six months. The cutout or extension area must be thirty-three percent or less of the total display area for each side of the sign, prior to the cutout or extension addition.

Billing
Permitted signs in each county will be inspected during the same month biennially, regardless of the issue date. It may be necessary to charge a one time pro-rated fee to adjust for the difference between the anniversary date and the county billing date. For subsequent biennial billing cycles, a biennial inspection fee in the amount of $100.00 shall be collected every two years. The fee will be considered delinquent if not paid within sixty days after the due date on the statement.

Transfer
It is the responsibility of the permit owner to inform MoDOT of sign transfers. When a permitted sign is sold, the permit must be transferred to the new owner. An Application to Transfer Outdoor Advertising Permit(s) and statement of intent to transfer the permit should be provided to the buyer when the sign is sold. The completed transfer application along with the statement of transfer and $10.00 transfer fee should be returned to the area permit specialist. Outstanding permit fees must be satisfied before a transfer can be processed.

Address Changes
It is the responsibility of the permit owner to notify MoDOT in writing of permit owner and landowner address changes. Contact the area permit specialist with any changes.
