### Standard Drawing Guidance (Do not show on plans):

Sheet for piles WITHOUT dynamic pile testing.

- Draw layout with bents labeled and provide numbering of piles. List in the tables the piles grouped by bents with the name of the bent included in the remarks column as a header for the piles located at that bent. Provide two blank rows after the last pile of each bent grouping to allow for additions in the field.

- Combine with As-Built Drilled Shaft Data if both piles and drilled shafts are shown on same sheet.

#### As-Built Pile Data

<table>
<thead>
<tr>
<th>Pile No.</th>
<th>Length</th>
<th>Computed Axial Compressive Resistance (kips)</th>
<th>Remarks</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
