Standard Drawing Guidance (do not show on plans):

1. Replace all expansion gaps with integral end bents in "Plan Showing Panel Placement".

2. For wide flange beams, change "Girder" to "Beam".

3. $XX = G - 1\frac{1}{8}"$ (1\frac{1}{8}" max.) If $XX$ equals $\frac{3}{8}"$, remove asterisk and note. $G$ is from the edge of the splice plate to the centerline of the nearest splice bolt.

4. Trade Section B-B as needed or omit if integral end bents.
