Plow Lift Chain Bracket

Description
A slotted bracket and pin configuration holds the plow lift chain to the plow frame rather than welding.

Benefit
Operators can quickly change the chain should a break occur during a snowstorm. No tools are necessary, so there is no need to return to the maintenance building. Reduced downtime means increased productivity.

Parts and Labor
- 5 in. – 3” square steel tubing
- 8 in. – 5/8” round rod
- 1 – 2-1/2” presto pin
Total $35
Labor 2 hours
