

PROPOSED DETOUR
Length: 28 miles

PROPOSED TRAFFIC IMPACTS

- Road closed at bridge during construction.
- The closure is anticipated to last three months.
- Osage County Route P, U.S. Route 63, and Maries County Route AA.

At 26 feet wide, the bridge is not wide enough to safely accommodate the traveling public, construction workers, and heavy equipment. Additionally, bridge decks built half at a time cost more and have a shorter lifespan.
