

Prospect Ave. over I-70 Bridge Replacement

PUBLIC INFO MEETING: Tuesday, March 29, 2022 4 - 6 PM at 2640 Prospect Ave, Kansas City, MO

ABOUT THE PROJECT

Beginning in Summer 2023, MoDOT Kansas City will be replacing the Prospect Ave. Bridge over Interstate 70. This bridge is considered in poor condition and is near the end of its intended service life. Total construction should take approximately 5-6 months.

GOALS

- Replace bridge in an economical manner while increasing vertical clearance over I-70.
- Maintain traffic flow on I-70 and viable detour routes of Prospect during construction.
- Coordinate with the future I-70 Corridor project.
- Minimize right-of-way impacts.
- Improve safety and operations of Prospect with I-70 and local roads.
- Accommodate KCMO long-term corridor plans and KCATA Prospect MAX route.
- Incorporate pedestrian and non-motorized user facilities.
- Communicate with local community and obtain stakeholder support for project.

This project will also include improvements to the interchange ramps and 14th Street. It will also honor the commitments of the Second Tier I-70 Environmental Impact Statement.

TRAFFIC IMPACTS

The bridge will be **CLOSED** to through traffic during construction. Chestnut Ave. will be used as a local detour. Busses will be re-routed and the ramps will be closed to traffic as needed.
