Details of Optional Slab Cantilever Replacement

Notes:

Minimum distance required for mechanical bar splice. All existing transverse slab reinforcement in this area shall be cleanly stripped.

With the optional slab cantilever replacement, the contractor shall use a mechanical bar splice for the existing exposed transverse slab reinforcement. The length of the new #6 reinforcing bars used with the mechanical bar splice shall be determined by the contractor based on the style of reinforcement for slab edges and any considerations. Mechanical bars splices shall be in accordance with Sec 706 except that there will be no separate pay item for mechanical bar splices. The mechanical bar splice used and other considerations. Mechanical bar splices shall be in accordance with the mechanical bar splice shown in the contract.

For spacing of longitudinal reinforcing steel, see Sheet No. .
