

# Road Wise

Parent/ Teen Safe Driving Guide EXPERIENCE
PUTS NEW DRIVERS AT A
HIGHER RISK FOR TRAFFIC CRASHES.
THE MORE THEY PRACTICE UNDER SUPERVISION,
THE BETTER THEY WILL HANDLE
DIFFERENT SITUATIONS
ON THE ROAD.

It is our hope that acquiring mature driving skills and judgment will be a rewarding and safe experience for both the new driver and their parents. This parent/teen-driving guide provides suggestions for in-car lessons to help you make this step to adulthood more successful for both of you. This booklet is not a substitute for the Missouri Driver Guide.

# Make sure you fully understand the Graduated Driver License (GDL) law located on page 4, then:

- Work through each lesson in order.
- Successfully complete the checklists after each lesson.
- Allow sufficient time for practice with a parent, guardian, grandparent or a certified driving instructor in the front seat.
- Take the parent/teen quiz at the end of the guide.
- Be patient, it takes many years of practice to become an experienced driver.

# Table of Contents

■ Lesson 1: Before You Hit the Road 12	2
■ Lesson 2: Reading the Signs	7

Parent/Teen Safe Driving Guide

#### **Definitions**

Immediate family shall include parents, grandparents, brothers, sisters, stepbrothers, stepsisters, and adopted or foster children residing in the driver's household. Parent shall include a foster parent, stepparent or adoptive parent.

Grandparent shall include a foster grandparent, step-grandparent or adoptive grandparent.

**Qualified driving instructor** is defined as an instructor who has a valid driver education endorsement on a teaching certificate issued by the Department of Elementary and Secondary Education, or a driver training instructor employed by a private driver education program.

**Qualified person** is a parent, legal guardian or certified trainer with a federal residential jobtraining program.

#### Missouri Graduated Driver License Law

Missouri's Graduated Driver License Law requires teen drivers to gain experience on the road and prove they are good drivers before graduating to a full license.

All first-time drivers between 15 and 18 years old must complete a period of driving with a licensed driver (instruction permit) and restricted driving (intermediate license) before getting a full driver license.

The instruction permit phase of the GDL requires teens to spend a minimum of 40 hours of driving, including a minimum of 10 hours of behind-the-wheel driving instruction that occurs during the nighttime hours falling between sunset and sunrise with an authorized person.

**Step One: Instruction Permit** 

Eligible Age: 15

**Cost: \$7** 

Valid for: 0-12 Months

To Obtain:

- You must pass the vision, road sign, and written tests.
- A qualified person must accompany you to the license office to sign a permission statement.

Read the Missouri Driver Guide. This booklet is your best resource for understanding driving laws and regulations. Pick one up at any:

- Department of Revenue branch or fee licensing office
- State Highway Patrol Troop Headquarters
- State Highway Patrol Driver Examination Office

#### **Permit Notes:**

- Under age 16, you may drive only when accompanied in the front seat by a licensed driver who is:
  - a parent, grandparent, or legal guardian;
  - a qualified driving instructor;
  - a qualified driver at least 25 years of age who has been licensed for a minimum of 3 years and received written permission from the parent or legal guardian; or
  - a qualified driver designated by a parent or guardian with a disability.
- At age 16 or older, you may drive when accompanied in the front seat by a person who is at least 21 years old and has a valid driver license.
- Seat belts must be worn by the driver and all passengers.
- Your test paper alone is not legal for driving. Be sure to carry your permit with you.
- You may renew your instruction permit.

#### To Graduate to an Intermediate License:

- You must have an instruction permit for a minimum of 182 days (beginning the day after issuance).
- You may not have any alcohol-related convictions in the last 12 months and no traffic convictions within the last 6 months.
- You must have received 40 hours of driving instruction, including a minimum of 10 hours of nighttime driving instruction between sunset and sunrise, with a qualified parent, legal guardian, or qualified driving instructor.

#### **Step Two: Intermediate License**

Eligible Age: 16 to 18

**Cost: \$11** 

Valid for: 0-2 Years

#### To Obtain:

- You must hold the instruction permit for at least 182 days (beginning the day after issuance).
- You may not have any alcohol-related offenses in the last 12 months and no traffic convictions in the last 6 months.
- A qualified person or grandparent must accompany you to the license office to verify you have received 40 hours of driving instruction, including a minimum of 10 hours of nighttime driving instruction between sunset and sunrise (see Log Book in this manual).
- You must pass the vision, road sign, and written tests if previous results are more than one year old.
- You must pass the driving test.

#### **License Notes:**

- Your test paper alone is not legal for driving. Be sure to carry your intermediate license with you.
- The driver and all passengers must wear safety belts.
- Passenger restrictions outlined below may not be applicable to an intermediate license holder who is operating in agricultural work-related activities.

#### **Driving Restrictions:**

- During the first 6 months, you may not operate a motor vehicle with more than one passenger who is under 19 years old and who is not a member of your immediate family.
- After the first 6 months, you may not operate a motor vehicle with more than three passengers who are under 19 years old and who are not members of your immediate family.
- You may not drive alone between 1 a.m. 5 a.m. except to and from a school activity, job, or for an emergency, unless accompanied by a licensed driver 21 years old or older.

#### To Graduate to an Under-21 Full Driver License:

- Your driving privilege cannot be suspended, revoked, or denied at the time of application.
- You may not have any alcohol-related offenses or traffic convictions within the last 12 months.

#### Step Three: Under 21 Full Driver License

Eligible Age: 18

**Cost: \$26** 

Valid for: 0-3 Years

#### To Obtain:

- You must satisfy the requirements for an Intermediate License, including having no alcohol-related offenses or traffic convictions in the last 12 months.
- You must have a valid intermediate license. Your intermediate license must not be suspended, revoked, or denied when you apply for a full license.
- You must pass the vision and road sign recognition tests. (You are not required to pass the written and driving tests if already completed.)

# 40 Hours in the Car With My Parents?

The 40 hours of driving practice may seem like a lot, but this requirement will provide ample time for you to practice driving in a variety of situations, at different locations and at varying times of the day. First Impact recommends around 100 hours or 1500 miles. This experience will help you become more confident and improve your driving skills so you are prepared when it's time to get a driver's license.

#### Follow these tips for safe driving:

- Get to know your car.
- Always wear your safety belt and make sure all passengers are wearing safety belts.
- Drive sober and ride only with sober drivers. Missouri enforces the Zero Tolerance law (see page 38) for individuals under 21 years of age.
- Drive defensively.
- Avoid distractions focus on your driving.
- Obey all traffic rules, signs, signals and markings.
- Be alert and anticipate what other drivers might do.
- Be careful at all intersections think ahead.
- Don't load up your car with more passengers than allowed by law.
- Don't exceed the posted speed limit or drive faster than you can handle.
- Don't let friends drive your car.
- Don't use your cell phone while driving (any handheld use of a phone while driving is against the law for all drivers in Missouri).

#### 40 Hours in the Car With My Teen?

Teaching your teen to drive will take patience and your full attention. Your new driver will make mistakes at first. That's normal. The key is to stay positive for your teen.

Follow these tips to make driving time with your teen positive and productive:

- Set a good example when you drive.
- Never use your cell phone while driving.
- Obey all traffic laws and drive courteously.
- Wear your safety belt and make sure all other passengers are buckled up as well.
- Be enthusiastic. Most teens are excited about getting their driver license. Don't make the learning experience seem like a chore.
- Use positive reinforcement. When your teen is doing well, let him or her know. When the new driver makes a mistake, use it as a chance to teach.
- Be ready to assume control of the vehicle.
  - Verbal control give clear, specific directions at least one block in advance that allow the new driver plenty of time to react. Don't yell.
  - Passive control Be ready to slightly turn the steering wheel to help your new driver avoid a dangerous situation.
  - Full control Sit close enough to reach the steering wheel. Once safe, stay calm and talk to your new driver about what happened.
- Practice in a vehicle that is in good working condition. If possible, use the vehicle your teen will be driving regularly.
- Practice in a safe location before hitting the road.
- Shift into neutral if going too fast, but not downhill.

# Lesson 1: Before You Hit the Road

Before doing any actual driving, you should have knowledge of the vehicle. Practice using these controls while the car is running with the transmission in the park/neutral position.

#### **Seat Belts**

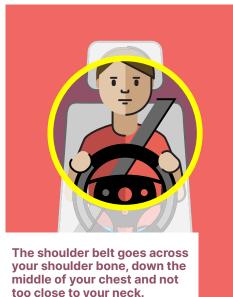

Adjust the seat so you can see clearly out of the vehicle's windows and windshield. After the seat is adjusted, correctly buckle your seat belt. This means both the lap and shoulder belt without tangles or twists securely across the chest and hips.

The top of the head rest should be somewhere between the top of your ears and the top of your head.

safety belt

#### **How a Seat Belt Should Fit:**

# **Anatomy of a Crash**

Without a seat belt, the human body will experience immense damage even in low-speed crashes. When a car hits something, the whole vehicle comes to a sudden stop. But everything inside the vehicle continues moving at the same speed until it meets something that will stop it. This collision force is how unrestrained passengers, bags, or even phones can become projectiles in a car crash. An unrestrained driver will collide with the steering wheel, windshield, or dashboard. As the body comes to a stop, the organs inside are still moving at the same speed until they collide into bones and muscles, causing internal injuries. These devastating injuries can be avoided by wearing a seat belt.

#### **Air Bags**

Air bags were created to enhance the safety of the safety belts in case of a vehicle crash. Sit at least 10 inches from the air bag compartments.

#### **Mirrors**

Adjust all mirrors so that you have the best view of what is happening behind and on all sides of the vehicle. Although mirrors help, there will still be blind spots that the mirrors do not cover. Be sure to turn your head to the left and right to check these areas.

#### **Fuel Gauge**

The fuel gauge does not always give an accurate picture of how much gas is in the vehicle's tank. It is always best to put gas in the tank before the gauge enters the highlighted "empty" area.

#### **Headlights and Warning Lights**

You are responsible for using the exterior lights at appropriate times and knowing the laws regarding their use. For instance, if your windshield wipers are on, the headlights must be on also.

Every vehicle has interior warning lights to notify you of problems with the vehicle. Most have warning lights for temperature, oil and battery issues. Make sure you know what the warning lights mean in the vehicle and to have the car serviced if necessary.

#### **Assistive Technology**

Newer vehicles have safety technologies such as backup cameras, blind spot monitoring, lane assist systems, adaptive cruise control, and other features that can prevent crashes and save lives. Lane assist systems monitor the car's position on the road, detect if the driver is leaving their lane and reacts either through warnings or by actively steering the car back into its lane. Cruise control helps maintain safe vehicle speed on highways. Adaptive cruise control (ACC) helps to maintain a safe following distance and stay within the speed limit. This system adjusts a car's speed automatically so drivers don't have to.

These technologies assist the driver, they do not replace the driver. The driver of the vehicle still needs to practice safe driving habits that will work in tandem with this technology. A driver must be alert and attentive at all times, even if the vehicle is equipped with helpful features.

PARENT'S TIP: Every car is different. Be sure your teen practices on the car they will regularly drive. Locate the vehicle owner manual and review it with your teen.

#### **Maintaining the Vehicle**

You will need to have some basic knowledge about vehicle maintenance, particularly with the vehicle you will be driving on a regular basis. Review and practice maintaining the vehicle's following areas:

- Fueling the car.
- Tire pressure (check tires for max psi).
- Engine oil (check the dipstick).
- Radiator coolant (check the plastic overflow bottle).
- Battery (check for tight connections).

### Lesson | Checklist:

Do not move on to the next lesson until you understand how each of the items in the list work. Additional items may be added.

- Safety belts
- Speedometer
- Odometer
- Fuel gauge
- Headlights (running lights, low beams and high beams)
- Turn signals
- Hazard lights
- Dimmer switch
- Horn
- Ignition
- Gear shift
- Accelerator pedal
- Brake pedal
- Clutch pedal (if applicable)
- Emergency brake
- Side and rear-view mirrors

Notes:

- Windshield wipers and washer fluid
- Sun visors
- Heater/air conditioner/ defroster
- Seat adjustments
- Steering wheel adjustments
- Window controls
- Radio controls
- Door locks
- Check engine oil
- Check radiator coolant
- Check battery
- Check tire pressure
- Cruise control
- Assistive Technology (back-up camera, lane assist, blind spot detection, etc.

# Lesson 2: Reading the Signs

It is very important that you understand all highway traffic signs and signals. The Department of Revenue's Missouri Driver Guide can provide additional information and guidelines on signs, signals and markings.

#### **Traffic Signs**

Words, symbols and shapes are used to give information quickly, at a glance. The shape and color of signs give clues to the type of information provided. Some important sign colors and shapes to recognize:

DIVIDED

- Red Stop, Yield, or Prohibited
- Yellow Warning
- Black & White Regulatory
- Orange Construction
- Fluorescent Green School
- Octagon Stop
- Triangle Yield
- Rectangle Regulatory
- Pentagon School
- Diamond Warning
- Cross buck or round Railroad

#### **Lesson 2 Activity**

Match the traffic signs below with their meanings.

- A. T End Road
- B. School crossing
- C. Merge
- D. No U-Turn
- E. Keep right
- F. School Bus Stop
- G. Lane ends/merge left
- H. Railroad crossing

Match the sign shapes to the messages below:

- A. Yield
- B. Railroad Crossing
- C. Stop
- D. Slow Vehicle

1.**C,** 2.**B,** 3.**B,** 4.**D**, 5.**E,** 6.**A**, 7.**D**, 8.**G** 

# Lesson 3: Hitting the Road

#### **Drive defensively**

Avoid danger by recognizing danger signs early and communicating with other drivers. Constantly scan the area you are driving so you can anticipate and react to any problems that might arise.

#### **Look Ahead**

The path in front of the driver is the most important, but drivers need to be aware of what is happening on all sides of the vehicle. Scanning the highway 20 to 30 seconds ahead gives the driver time to decide what actions may need to be taken. In heavy traffic, the driver should watch for brake lights three or four vehicles ahead in order to have time to react. Also, don't forget to use the rear-view and side-view mirrors to access situations on all sides of the vehicle.

PARENT'S TIP: Start your teen's driving lessons on less-traveled roadways. Don't take your new driver night driving until they have mastered the basic driving skills.

#### **Watch Your Speed**

There are speed limit signs posted on the side of the road to tell drivers the maximum speed allowed by the law. The speed limit can also inform drivers that a road may be too curvy or dangerous to drive over the posted limit. No matter the speed limit, drivers should slow down in certain weather conditions and at night. Reaction time is shorter when visual distance is shorter, which makes driving at higher speeds dangerous. Practice keeping the vehicle at an appropriate, steady speed and periodically check the speedometer. Driving at the appropriate speed means driving:

- Within the posted speed limit for the roadway
- According to traffic and weather conditions
- Within the vehicle's capabilities
- Within the driver's abilities

If the driver is uncomfortable they should slow down or ask someone else to drive.

#### **Keep Your Distance**

In normal conditions, the vehicle should stay three to four seconds behind the vehicle in front. To measure this, when the vehicle in front of you passes a stationary object, count "one one-thousand, two one-thousand, etc." Your vehicle should not pass the same object until the three to four second count is completed.

Slow down and increase your following distance even more during adverse weather conditions or when visibility is reduced. Increase to a six to eight second following distance in fog, rain, snow and ice. Also increase your following distance if you are driving a larger vehicle or towing a trailer.

#### **Pay Attention to Your Lane Position**

When possible, keep your vehicle in the center of the driving lane, not on the edges. Small steering adjustments will need to be made to ensure proper positioning, but do not jerk the steering wheel. Both hands should remain on the steering wheel when making a sharp turn.

Remember to periodically check all mirrors to keep track of what is happening on all sides of the vehicle and use head checks for blind spots!

PARENT'S TIP: Remember to lead by example. When you follow the rules of the road, your new driver is likely to do the same. Wear your safety belt, obey the speed limit, don't drive distracted and never drive under the influence of alcohol or other drugs.

## Lesson 3 Checklist

- Watches sides and middle of road
- Checks rear view and side mirrors frequently
- Follows at a safe distance
- Drives at an appropriate speed
- Keeps vehicle in center of driving lane
- Checks blind spots
- Able to maintain 3-4 seconds behind other vehicles, when possible

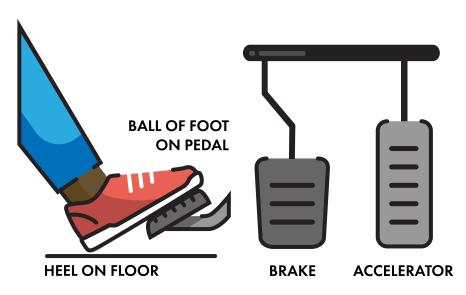

# Lesson 4: Mastering Driving Skills

You will need plenty of practice handling a moving vehicle. The following are specific driving skills you should practice with your parents in a vehicle.

#### **Starting and Stopping**

Acceleration should be slow and smooth. This will take practice. Pressure should be applied to the pedal with the ball of the foot instead of the whole foot.

Slowing down and/or stopping should also be steady and smooth. Practice easing the ball of the foot off of the gas pedal and gently applying the brake pedal in the same manner. Smooth, steady deceleration is used during normal driving conditions, however, being able to brake quickly is also important for emergency situations. Firm steady, pressure should be used with anti-lock brakes.

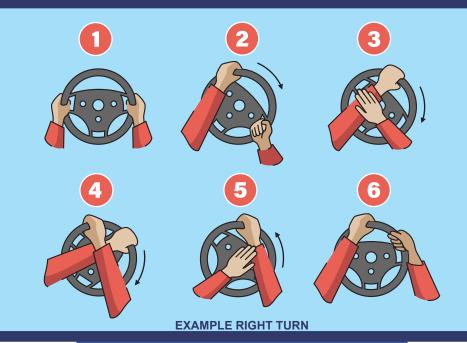

#### **Turning**

The recommended driver hand position is 9 and 3 o'clock. Because the hands are never on the top of the steering wheel, this position allows for more control of the steering wheel. This means less chance of injury to the face by the hands and arms in a frontal crash.

Use both hands in a hand-over-hand motion for turns. Hold onto the wheel and move the hand opposite the direction you're turning toward the other hand. At 3 o'clock position, take your other hand and cross it over the one holding onto the wheel. Grab onto the wheel at the position your other hand was previously and continue this motion until the turn is complete.

PARENT'S TIP: Take your teen to practice in a safe location, such as an empty parking lot, before moving to a roadway. Do not teach shortcuts or improper procedures.

#### **Practice:**

- Using the correct turn signal about 100 feet before the turn or intersection.
- Placing the vehicle in the proper lane.
- Checking traffic in all directions.
- Slowing down or stopping prior to the turn.
- Yielding to other vehicles and pedestrians.

#### **Backing Up**

When it is necessary to back the vehicle into a parking space or out of a driveway, always:

- Check for traffic, pedestrians, parked cars and stationary objects behind you.
- Turn your head to look out the rear window. Don't rely on your mirrors or back-up camera.
- Place your right arm at the back of the passenger seat and look through the rear window. Place your left hand at the top of the steering wheel. When you want to change directions, move your left hand in the direction you want the rear of the car to go.
- Make small corrections to the steering wheel.
- Keep your foot in light contact with the brake while the car is moving backward.
- Glance quickly to the front and sides to check traffic then continue looking through the rear window as you brake smoothly.

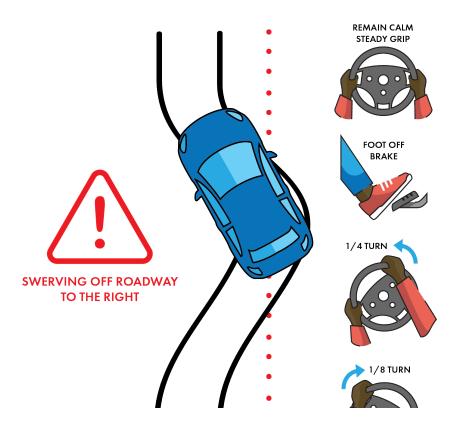

Never back up faster than a walking pace. When you get close to an object, back up inch by inch.

#### **Off-Road Recovery**

When a car runs off the road, many drivers initial response is to panic and overcorrect causing the driver to lose control of the car. Do not practice this activity but be aware of the steps that should be taken if the vehicle should travel off the roadway to the right:

- Remain calm; don't panic and overcorrect.
- Keep a firm grip on the wheel.
- Ease off the gas and stay off brake.
- Turn your wheel 1/4 turn to the left.
- When you feel your tires hit pavement again, turn wheel 1/8 turn to the right.
- Ease back onto the roadway.

#### Intersections

Intersections can be dangerous places for new drivers. There is a lot of activity and rules to remember when traveling through an intersection. Always slow down, look both ways, and check for oncoming traffic and pedestrians. Be prepared to stop or get your vehicle out of the way.

#### **Right of Way**

At a four-way stop, the vehicle arriving first should have the right of way. Come to a complete stop and proceed with caution. If unsure who has the right of way, use eye contact and communication with the other drivers and proceed with caution when it is safe to do so. At an intersection without a stop sign or traffic signal, yield to vehicles coming from the right.

#### Always yield to:

A blind pedestrian crossing the street guided by a dog or carrying a white cane.

A school bus picking up or dropping off children.

Any emergency vehicle using sirens and/or flashing lights.

Railroad crossings. Trains cannot stop in time to avoid hitting a vehicle.

#### **Changing Lanes**

When changing lanes, always put the turn signal on prior to repositioning the vehicle to give other drivers plenty of warning. Be sure to check for traffic on all sides, checking for blind spots and motorcycles, before slowly and progressively repositioning the vehicle into the new lane. Remember to turn off the turn signal when complete!

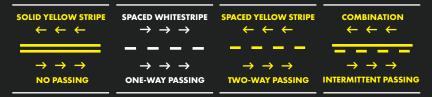

#### **Merging in Traffic**

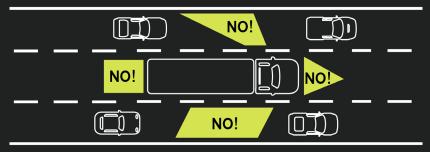

The right of way belongs to the moving traffic. Other drivers are not required to change lanes to allow vehicles to enter. When allowing other vehicles to merge, if it is safe, change lanes to allow the vehicle room to merge. If it is unsafe to change lanes, it may still be possible to accelerate or decelerate to allow others to merge (provided it is safe to do so).

#### Passing Other Vehicles

Only pass other vehicles when it is absolutely safe to do so. Use extreme caution when passing on a two-lane highway. Do not pass on a hill, curve, no-passing zone or a construction or work zone. Use care when passing a pedestrian or cyclist. Slow down and wait for a safe opportunity. Make sure you can clearly see ahead to determine if there is oncoming traffic before passing. Do not speed up when being passed. Move a little to the right and be prepared to slow down if the passing driver suddenly views a problem ahead while passing.

### PASSING LANES: ONLY PASS OTHER VEHICLES WHEN IT IS ABSOLUTELY SAFE TO DO SO.

# BIG TRUCKS HAVE BIG BLIND SPOTS

#### Large Trucks

Never linger alongside a large truck or bus. These vehicles have large blind sports, or "No-Zones" on all four sides. If you can't see the driver's face in the side-view mirror, the driver likely cannot see you. Merging too close in front of a large truck or bus is especially dangerous. Make sure you can see both their headlights in your rearview mirror before merging, and always maintain a large, safe distance behind a large truck or bus.

#### **Nighttime Driving**

After a driver has mastered the basic driving skills during the day, they may begin learning night driving skills. Nighttime driving requires motorists to drive more slowly since visibility is reduced in all directions. Headlights should be on between sunset and sunrise.

PARENT'S TIP: Have your teen practice passing on a multi-lane highway (two lanes going the same direction) before passing on a two-lane highway.

### Lesson 4 Checklist

#### Starting and stopping

- Starts and stops smoothly
- Keeps speed consistent
- Checks blind spots

#### **Turning**

- Signals and slows for all turns
- Checks all directions for traffic
- Yields to pedestrians and oncoming traffic
- Enters turning lane if available

#### **Backing**

- Checks all around vehicle before moving
- Periodically checks behind and in front of vehicle
- Maintains slow speed

#### **Changing lane and passing**

- Checks mirrors and blind spots before changing lanes
- Uses turn signal before changing lanes
- Does not tailgate before passing other vehicles
- Uses turn signal before pulling out to pass

- Before passing, checks mirrors and blind spots
- Changes lanes smoothly
- Allows safe distance before returning to the appropriate driving lane
- Does not pass when it is not safe

#### Merging

- Uses turn signal
- Yields right of way
- Checks mirrors and blind spots
- Enters proper driving lane when it is safe
- Adjusts to a safe distance between other vehicles
- Identifies a merging vehicle
- Changes lanes to allow a vehicle to merge, if safe

#### **Other**

- Maintains vehicle position in the center of the lane
- Checks mirrors periodically
- Steers smoothly

# **Lesson 5: Parking Practice**

Practice parking in different situations. Never park in front of a driveway, within 10 feet of a fire hydrant, in or near intersections or close to crosswalks or stop signs.

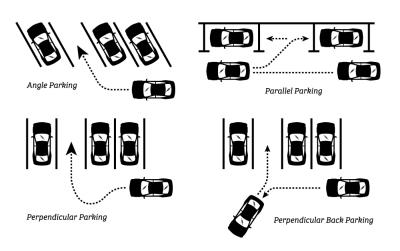

#### Straight and Angle Parking

#### **Entering the space:**

- Signal and slow or stop the vehicle.
- Drive forward until the whole parking space is visible.
- Turn in, trying to keep equal distance on both sides of the vehicle.
- Pull forward until the vehicle is completely in the space.

#### **Exiting the space:**

- Check behind the vehicle for traffic and pedestrians.
- Begin backing out straight
- Begin to turn the steering wheel when you can see down the bumper line, checking the front of the vehicle to ensure it clears other vehicles.
- Continue to check for traffic and pedestrians.
- Straighten the vehicle in the proper lane.

#### Parking on hills:

- Park close to the curb or if there is no curb, as far away from traffic as possible.
- Turn your wheels in the proper direction (see graphic).
- Turn off the motor, putting the car in proper gear.
- Set the emergency brake.
- Check your rearview mirror for traffic before stepping out.

#### Reentering traffic:

- Turn on turn signal.
- Check for oncoming traffic and pedestrians, including looking in blind spots.
- Straighten wheels.
- Back slowly, if necessary.
- Move forward, turning the steering wheel toward the traffic lane.
- Check for oncoming traffic before moving out.

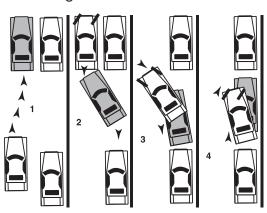

#### **Parallel Parking**

#### **Entering the space:**

- Turn on turn signal.
- Check mirrors to make sure that traffic is slowing.
- Stop when your steering wheel is even with the steering wheel of the vehicle in front of the parking space.
- Back up and turn toward the curb until the vehicle is at a 45-degree angle heading into the parking space.
- Turn the steering wheel in the opposite direction and continue backing slowly.
- Check the vehicle position behind and ahead, making sure the car does not hit any parked vehicles. Watch for pedestrians stepping off the curb.
- When the vehicle is about a foot from the vehicle in back, stop. Center your vehicle by pulling forward.

#### **Exiting the space:**

- Turn on turn signal.
- Check for oncoming traffic and pedestrians.
- Back up until the vehicle is about a foot away from the vehicle behind you.
- Check again for traffic and pedestrians; be sure to check blind spots.
- Turn the wheel and slowly pull forward into the driving lane.

Be careful not to cross the centerline of the roadway.

### Lesson 5 Checklist

#### Parking downhill/uphill

- Uses turn signal
- Checks for traffic and pedestrians
- Parks within 18 inches of the curb
- Turns wheels the correct direction
- Puts vehicle in park (first gear for standard transmissions)
- Applies emergency brake

#### **Parallel Parking**

- Uses turn signal
- Checks for traffic and pedestrians
- Correctly positions vehicle in preparation for backing
- Correctly backs vehicle into parking space
- Stops before changing direction
- Correctly centers vehicle

#### **Exiting the space/reentering traffic**

- Checks available backing distance
- Uses turn signal
- Checks for traffic and pedestrians in front and back of vehicle
- Exits space safely
- Does not cross center lane

#### Angle and 90-degree parking

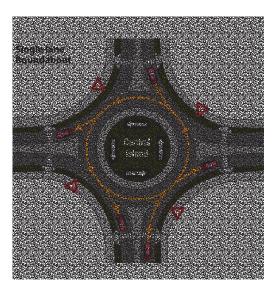

- Uses turn signal
- Moves forward until whole space is in view
- Turns safely into parking space
- Pulls entire vehicle into space
- Leaves enough space between other vehicles

### **Lesson 6: Intersections**

#### Roundabout

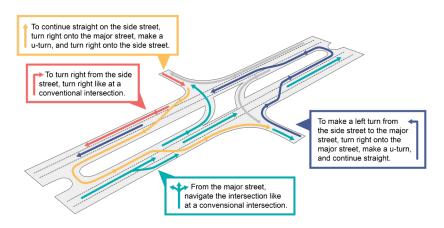

As you approach a roundabout, slow down and be prepared to stop and yield to traffic in the roundabout.

When a gap in traffic appears on your left, enter the roundabout by turning right and following the circle until reaching your exit. Use your turn signal when leaving the roundabout.

#### **J-Turns**

The "j-turn" is an alternative to traditional roadway intersections on a four-lane highway. Instead of motorists crossing fast-moving lanes of traffic to get to the opposing lanes, drivers at a j-turn intersection turn right in the same direction of traffic, merge into the left lane, and then make a left turn in the direction they intend to travel.

#### **Diverging Diamond**

Traffic crosses and travels between the ramps of the interchange on the left side of the road and then crosses back to the right at the end. Traffic coming from the other direction will do the same on the right side of the interchange.

#### **Steady Circular Red**

Requires you to stop and wait during this interval.

#### **Steady Yellow Arrow**

Warns you that the left-turn signal is about to change to red and that you should prepare to stop – or prepare to complete your left turn if you are legally within the intersection and there is no conflicting traffic present.

#### **Flashing Yellow Arrow**

Allows you to turn left when oncoming traffic is clear (oncoming traffic has a green light). You must carefully determine that there is an adequate gap in the oncoming traffic, and ensure that there are no pedestrian conflicts, before making your turn.

#### **Steady Green Arrow**

Allows you to turn left.

# Lesson 6 Checklist:

#### Roundabout:

- Slows down when approaching
- Yields to traffic already circulating
- Stops when it is not safe to enter
- Use signal when exiting roundabout

#### J Turns:

- Turns right in the same direction of traffic
- Merges smoothly into the left lane
- Makes left J turn at appropriate intersection

## **Diverging Diamond:**

- Smoothly follows the flow of traffic
- Crosses lanes to appropriate side of intersection
- Crosses back over lanes to driving lanes at end of intersection

#### Flashing Yellow Arrow:

- Stops on red light
- Prepares to stop when light is a steady yellow arrow
- Yields to oncoming traffic and proceeds across intersection when yellow arrow is flashing
- Proceeds smoothly through intersection on green light

# RESPONSIBILITY

Traffic crashes are the number one killer of young people. Please understand that following the advice can mean the difference between life and death. Driving a vehicle is a huge responsibility and should never be taken for granted.

# **Never Speed**

Speeding is a major cause of traffic crashes. Always drive at a safe speed and never drive faster than the posted speed limit. More drivers are convicted of speeding than any other traffic offense. Remember, the speed limit is the maximum speed allowed under normal conditions. The safe speed is the one that allows complete control of the vehicle.

# **Do Not Respond to Aggressive Drivers**

Any reaction from other drivers usually makes the situation worse. Do not respond if confronted with an aggressive driver. If an aggressive driver is causing an unsafe situation for other drivers, stay calm. Stop at a safe place and call the police and/or sheriff to report the incident. If using a cell phone dial \*55 or 911 from a landline. Do the same if you think a driver is driving impaired.

## **Avoid Distractions**

All of a driver's attention needs to be on driving. Distracted drivers react slower creating a dangerous situation for themselves and others. Not only do the driver's eyes and ears need to be focused on the road, but their mind needs to be focused on the task of driving, too.

#### Common distractions are:

- Cell phone use including texting, making phone calls, and using social media.
- Eating or drinking.
- Adjusting the radio, music selection, temperature or other controls.
- Listening to loud music or wearing headphones.
- Passengers.

Missouri law prohibits all drivers of all ages from holding or supporting a cell phone or other wireless device while driving.

#### THIS LAW ALSO PROHIBITS:

PHYSICALLY
HOLDING
A CELLPHONE
WITH ANY PART
OF THE BODY

MANUALLY SENDING OR READING TEXT-BASED MESSAGES

RECORDING OR SENDING VIDEO, VIDEO CALLS OR SOCIAL MEDIA POSTS

A VIDEO OR MOVIE

Fines for breaking this law range from \$150 (first conviction) to \$500 (third conviction)

# **Stay Alert While Driving**

Watch out for other drivers who are not obeying the rules of the road or are driving irresponsibly. Watch for those who:

- Take wide turns or cut corners.
- Straddle the center line.
- Pass objects or vehicles too closely.
- Drive too fast or too slow.
- Hug the edge of the road.
- Weave or zigzag.
- Stop and start in a jerky manner.
- Follow other vehicles too closely.

If anyone is driving unsafely, please pull over to a safe location and call \*55 from a cell phone or 1-800-525-5555 and report the behavior and license plate number or description of the vehicle to the Highway Patrol.

## **Don't Drive When Tired**

Drowsy drivers are impaired drivers. When a drowsy driver is behind the wheel, they have a tendency to drive off the roadway, cross the centerline, brake frequently, tailgate or drive considerably under the speed limit. These are all unsafe actions of a driver. If you feel your eyelids get heavy, and blinking becomes slow and lethargic, or your head feels heavy and begins to nod, pull over and rest or ask someone else to drive.

# Yield to Emergency Vehicles

Both drivers and pedestrians must yield the right of way to lawenforcement vehicles, fire engines, and other emergency vehicles using sirens and/or flashing lights. Slow down and pull to the right side of the road, if possible. Bring the vehicle to a stop, but be sure not

to block intersections. At an intersection, continue to yield to an emergency vehicle even if the light turns green.

## **Move Over Law**

The law requires motorists to slow down or, if safe to do so, change lanes when approaching emergency response vehicles, tow trucks, law enforcement vehicles and MoDOT vehicles with flashing lights parked on the side of the road.

Hit a Worker

\$10,000 Fine Lose Your License

# **Work Zone Safety**

Be patient when approaching road construction areas. These crews work very hard to improve the roadways for

motorists. Speed limits may be lowered in these areas for your safety and the safety of the work crew. The number one cause of traffic crashes in work zones is driving too fast. Missouri's penalty for speeding in work zones is very expensive. Slow down and pay attention in work zones.

# Windshield Wipers and Headlights

In Missouri, headlights must be on when your windshield wipers are on. Headlights must also be on during periods of fog. Having your headlights on in rain and fog helps you see the road, and it helps other drivers see you.

## **Steer Clear**

If a crash should occur, move the vehicle off the roadway if possible. Vehicles left in the roadway could cause additional crashes. Turn on your flashers to warn approaching traffic.

- Make sure someone calls 911. Help anyone who is hurt, avoiding direct contact with blood. DO NOT try to move an injured person unless their safety is at risk.
- Exchange the following information with those involved in the crash:
  - Names and addresses.
  - License plate numbers and vehicle identification numbers.
  - Insurance company names and policy numbers.
- Do not leave the scene until a law enforcement officer says you can.

# **Law Enforcement Stops**

Slow down, use your turn signal, and pull off the road to the right as far as possible. If you are traveling on a road with no shoulder and it is unsafe to stop, slow down, turn on your hazard lights, and proceed to a location where it is safe to stop, such as a driveway or parking lot. Turn the interior lights on at night. Keep your seatbelt on and place your hands on top of the steering wheel so the officer knows you are not a threat. Calmly follow their

instructions. The officer may ask to see your driver license, proof of insurance, and possibly your vehicle registration. Before you reach for anything in the vehicle, communicate what you are doing. The trooper may ask you to exit your vehicle and sit in their patrol car.

# **Impaired Driving**

It is illegal to drink alcohol or consume cannabis under the age of 21 in Missouri. It is also illegal for anyone to drive while impaired, whether by alcohol or other drugs, at any time in Missouri. A law enforcement officer has the right to measure the blood alcohol concentration (BAC) of any driver who appears to be intoxicated. BAC can be measured by testing blood, breath, or urine.

Missouri has a zero tolerance law, which means anyone under the age of 21 driving with a BAC of .02% or higher will have their license suspended for 30 days, followed by 60 days of restricted driving. If convicted, they will also pay a fine and be required to complete a substance abuse program for traffic offenders.

Note: the zero tolerance limit is set at .02% BAC to allow for medications and mouth washes—NOT alcoholic beverages.

Any driver under 21 convicted of an alcohol-related offense within the last 12 months will not be eligible for a full drivers license.

# Test Your Knowledge

### **Parent Quiz**

 Traffic crashes are the third-leading cause of death among young people ages 15-20.

True False

2. Missouri's GDL program requires parents to spend 40 hours of practice driving, including 10 hours at night, with their teenagers behind the wheel.

True False

Under the age of 16, a teen may drive only when accompanied in the front seat by a qualified person, grandparent, or qualified driving instructor.

True False

 Your teen must not have any alcohol-related offenses or traffic convictions within the last 12 months to graduate through the licensing phase of the GDL program.

True False

5. The fine for using a phone while driving is \$75.

True False

6. More drivers are convicted of speeding than any other traffic offense.

True False

7. During the first six months of an intermediate license, your teen may not drive with more than one passenger who is under 19 years old and who is not a member of your family.

#### True False

8. You should teach your teen to apply pressure to the pedal with their whole foot.

#### True False

9. Correct steering wheel hand position is 9 and 3 o'clock.

#### True False

10. Drivers under age 18 are subject to nighttime driving restrictions between 1 and 5 a.m.

#### True False

#### Parent Quiz Answers:

- 1. False Traffic crashes are the leading cause of death among young people ages 15-20.
- 2. True
- 3. True
- 4. True
- 5. False the fine for using a phone while driving under Missouri law starts at \$150.
- 6. True
- 7. True
- 8. False Pressure should be applied to the pedals with the ball of the foot, not the whole foot.
- 9. True
- 10. True

## **Teen Quiz**

This quiz is not a study guide for the Missouri Driver Exam.

 Cell phone use while driving is against the law for all drivers.

True False

2. A teen driver is only allowed one traffic conviction within the last 6 months in order to move to the next phase.

True False

3. Safety belts must be worn in the vehicle at all times by everyone.

True False

4. Drivers under age 21 caught driving with alcohol in their system will lose their driver's license.

True False

5. Correct hand positioning on the steering wheel should be at 8 and 5 o'clock.

True False

6. When making a left turn, the right of way belongs to the oncoming traffic.

True False

7. Headlights are required to be on when wipers are on.

True False

8. Your vehicle should stay to the right-hand side of the driving lane.

#### True False

9. If you're parking downhill, wheels should be turned toward the road edge or curb.

#### True False

10. During the first six months of an intermediate license, you may not drive with more than one passenger who is under 19 years old and who is not a member of your family.

#### True False

#### Teen Quiz Answers:

- 1. True
- 2. False you may not have any traffic convictions for 12 months
- 3. True
- 4. True
- 5. False Hands should be positioned on the steering wheel at 9 and 3 o'clock.
- 6. True
- 7. True
- 8. False Keep your vehicle in the center of the lane, not on the edges.
- 9. True
- 10. True

# Overview Checklist

Now that you've completed all the lessons in this guide, keep track of what you are doing well and where more practice is needed.

- Completes basic pre-operation checks (tires, area around vehicle, warning lights)
- Adjusts seat and steering wheel for comfort and control
- Buckles safety belt correctly
- Adjusts mirrors to maximize visibility and minimize blind spots
- Starts engine
- Applies appropriate pressure to gas pedal for smooth acceleration and proper speed
- Brakes and stops on a hill smoothly
- Turns right safely
- Turns left safely
- Able to angle park
- Able to park at a 90 degree angle
- Able to parallel park
- Able to park uphill
- Able to park downhill
- Observes and obeys the speed limit
- Adjusts speed for driving conditions
- Understands and uses the appropriate "seconds" rule for following vehicles
- Maintains proper lane position
- Changes lanes properly
- Passes vehicles safely
- Merges safely
- Communicates with other drivers properly

# Practice Driving Log

Use the driving log on the following pages to track skill progression as you complete your 40 hours of driving practice.

## Remember

Be in a "practicing mood." Practice when you are in a good mood and have sufficient time.

Adjust mirrors and seats before starting the vehicle.

Wear your safety belt every time you are in a vehicle.

Come to a complete stop at stop signs and for right turns at red lights.

Use caution when proceeding from a stop. Look all directions.

Keep your eyes moving. Use the mirrors to check around and behind the vehicle and don't forget about the blind spots.

Don't tailgate. Maintain at least four seconds of space between your vehicle and others.

Avoid the "No-Zone" of large trucks. Remember if you cannot see the driver in their mirrors, they cannot see you.

Speed increases braking distance. Double your speed – quadruple your braking distance.

Vehicle weight increases braking distance. Double the vehicle weight – double your braking distance.

# Driving Contract Between Teen and Parent

# As a new driver I promise to:

- 1. Always wear my seat belt and require all passengers to do so.
- 2. Never drive after consuming alcohol or other drugs.
- 3. Never drive impaired or ride with an impaired driver. I will call for a ride if it's not safe to drive or ride.
- 4. Be a passenger only with drivers who are alcohol- and drug-free.
- 5. Always call for a ride if it's not safe to drive or ride
- 6. Call before getting in the car if I will be more than \_\_\_\_\_ minutes late.
- Drive at safe speeds for road conditions drive at or below the speed limit.
- 8. Never engage in racing, stunts, or other thrill-seeking activities.
- 9. Not conceal tickets, warnings, or crashes.
- 10. Not drive when tired.
- 11. Never use a cell phone or other electronic device when driving.
- 12. Not drive aggressively, tailgate, or speed up to get through yellow lights.
- 13. Not allow anyone else to drive the car.
- 14. Abide by passenger and night driving provisions.

15.	Other:	

# As your parent/guardian I promise to:

- 1. Be available for practice on a variety of road types and driving conditions.
- 2. Be available to pick you up if it's not safe for you to drive or ride.

# **The Following Provisions Are Agreed Upon:**

These Provisions Should be Periodically Reviewed.

year of licensure:	s under age 20 allowed during first
*Maximum allowed by I	
Extra passengers will r available for each pers	not be allowed if seat belts are not on.
Nighttime driving	ı limitations:
During the first year of	licensure, no driving from:
☐ 1 a.m. to 5 a.m. (as required by law)	p.m. or dark to 5 a.m. (use this option to extend the nighttime driving limitation)
Consequences for	or breaking this agreement:
Teen's signature	Date
Parent's signature	

# OTHER DRIVER EDUCATION RESOURCES

The following resources provide additional driving information and help you understand the importance of safe driving habits. Remember to use the *Missouri Driver Guide* to supplement this workbook.
