

Project Overview

MoDOT is planning pavement improvements along I-44 in and near the communities of Rolla and St. James. These improvements include rebuilding interstate pavement, a bridge replacement, and interchange upgrades to improve drivability, safety and capacity along this section of I-44.

What This Means for Drivers

- A smoother, more consistent drive.
- Improved safety across the entire area.
- Capacity needs addressed in the project area.

Project Area

The improvements include approximately 10.4 miles of westbound I-44 from 0.5 miles east of the U.S. Route 63 interchange in Rolla to the Sugar Tree Road interchange west of Doolittle, interchange improvements and a bridge replacement at Route V, and improvements at the Route 68/8 interchange. Pending available funding, pavement improvements to the eastbound lanes of I-44 in Rolla may be included.
