

ROUNDBOUT CONSTRUCTION

ROUTE 51/72 INTERSECTION IN PATTON, MO

ABOUT

The proposed project includes constructing a roundabout at the Route 51/72 intersection in Patton, Missouri. Currently, the intersection has stop control on Route 51 with traffic on Route 72 moving freely.

Roundabouts allow traffic to flow with little to no stopping, resulting in calmer traffic and reducing the likelihood of severe crashes.

TIMELINE

Tentatively, the project is expected to be let in January 2025. Construction could begin as early as March 2025. Completion is anticipated in winter 2025.

TRAFFIC

Work will be staged to allow the intersection to remain open with minor impacts as tie-ins to the existing roadway are completed.
