

ROUNDAABOUT CONSTRUCTION

ROUTE C/V/160 INTERSECTION IN BUTLER COUNTY

ABOUT

The proposed project includes constructing a roundabout at the intersection of Routes C/V and Route 160. This will improve sight distance and better accommodate intersection capacity and future growth.

TIMELINE

Tentatively, the project is expected to be let in spring 2025. Construction could begin as early as summer 2025. Completion is anticipated in fall/winter 2025.

TRAFFIC

Work will be staged to allow the intersection to remain open with minor impacts as tie-ins to the existing roadway are completed.

ROUNDAABOUT BENEFITS

Roundabouts allow traffic to flow with little to no stopping, resulting in calmer traffic and reducing the likelihood of severe crashes. Signalized intersections have approximately 20-30 conflict points, or spots where vehicles could collide, and roundabouts reduce that number to eight.
