

Route 100, Franklin County

PUBLIC MEETING

December 1, 2022 | 4:00-6:00 p.m.

Why are we here?

MoDOT conducted a Traffic and Safety Study on Missouri Route 100 in Washington, MO to address traffic and safety concerns. The study was completed in July 2022.

Corridor Issues

TRAFFIC

- High traffic volumes at intersections
- Short or no turning lanes
 - Traffic backs onto traveling lanes

SAFETY

- High speeds
 - Approximately 10 mph over speed limit
- High crash rates at intersections
 - 43% of all crashes rear end

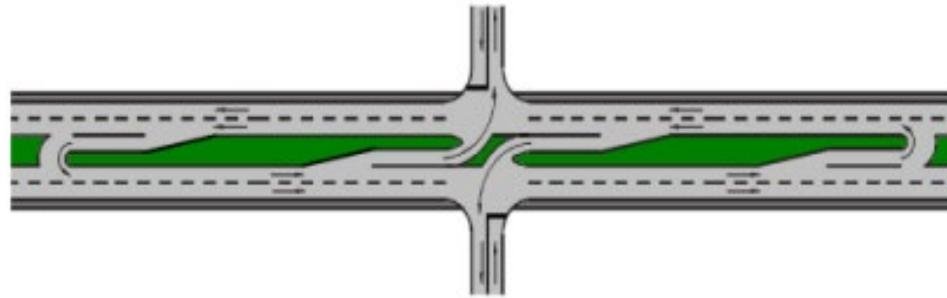

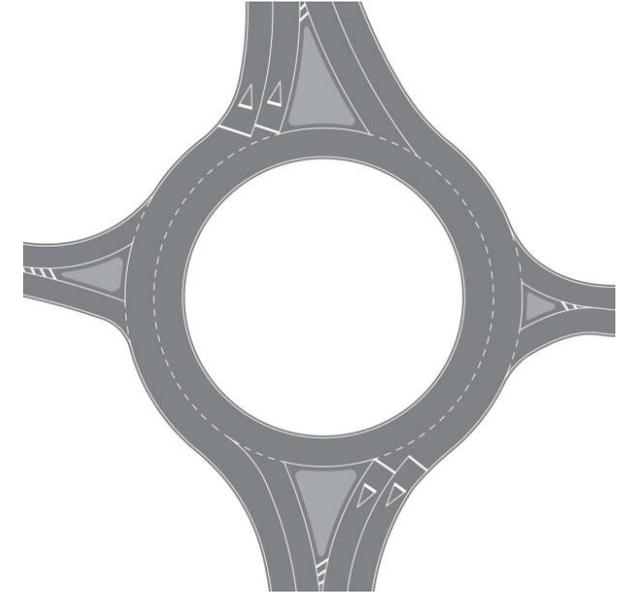

Intersection Improvements

Study considerations

MoDOT did a Traffic and Safety Study on MO Route 100, which was completed in July 2022. Some of the alternatives that were studied include:

- Roundabouts
- J-Turns
- Traffic Signals
- Add or extend
 - Acceleration/Deceleration Lanes
 - Turning Lanes

Intersection Improvements

Traffic Flow:

Improve traffic flow by providing alternatives that provide for continuous movement.

Traffic Safety:

Reduction in conflict points when compared to conventional intersections.

Traffic Safety:

Reduction in crashes when comparing to existing conditions.

Timeline

- Traffic and Safety study completed for this corridor (July 2022).
- No construction funding assigned for any improvements.
- Potential future projects
 - Standalone
 - As part of other improvements within the corridor
