

Project Terms

MoDOT will be **REHABILITATING** and **REPLACING BRIDGES** and **BOX CULVERTS**.

What is a **box culvert**?

A **box culvert** is a large concrete tunnel-like structure that supports a road while also allowing water to flow underneath it.

What is the difference between **rehabilitation** and **replacement**?

Rehabilitation improves and extends the life of an existing structure.

Replacement involves removing the existing structure and building a new one.
