download the
Forward 44 Purpose
& Need Study.

MoDOT launched the Forward 44 Study in 2024 with funds from the Missouri State Legislature to update and validate the original I-44 Purpose and Need Study from 2008.

The study team collected data and gathered input from stakeholders and the public to identify key areas of concern.

MoDOT then prioritized the I-44 corridor into clear, independent segments to guide future Forward 44 projects as funding becomes available.

MoDOT identified the need for pavement and bridge improvements along I-44 in St. Louis County, between Eureka and Valley Park.
