

Standard Drawing Guidance
(do not show on plans):

① Remove if not required.

② Use the following values for clearance to top longitudinal bars:
3 1/8" for #5 bars

3" for #6 bars

2 7/8" for #7 bars

2 3/4" for #8 bars

Use a triple asterisk when there are different size top bars and add below the single asterisk note the following (modified as needed) (this will be the only asterisk note for CIP decks):

*** 3 1/8" (#5)

3" (#6)

2 7/8" (#7)

2 3/4" (#8)

Clearance values based on the #6 top transverse bar used for this standard slab. Values will need to be revised for other size transverse bars.

③ The larger negative moment reinforcement shown is grouped and can be deleted if the negative moment steel is the same size as the distribution reinforcement. A set of bars the same size as the distribution bars exist behind the larger bars shown, and will become visible when the larger bars are deleted. (No need to resize)

④ The subheadings and negative moment bars are grouped and can be deleted for single span bridges. <Ctrl> U to ungroup

⑤ Place appropriate slab pouring sequence cell and modify as required.

⑥ Use alternate detail for CIP decks:

Finish each side of joint with 1/4" radius edging tool

SLAB CONSTRUCTION JOINT

⑦ Remove for CIP deck

Girder spacing and reinforcement size & spacing shown are not necessarily standard. Follow design.

OPTIONAL SHIFTING TOP BARS AT BARRIER

SLAB07_38ft_symm Effective: Apr. 2020 Supersedes: June 2016

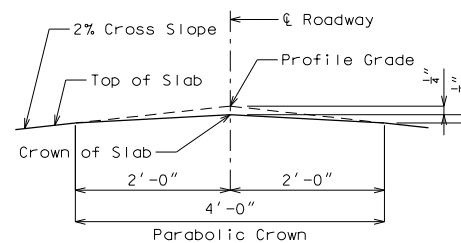

Alternate detail for Type H barrier
