The provided image contains a detailed engineering drawing of a strip seal expansion joint system for Type B barrier (SBC). The drawing includes various sections, elevations, and plans with labels indicating left and right advanced positions. The drawing also features a table of allowed transverse strip seal expansion system variations, detailing different installation gaps and temperatures. The drawing is marked as alternate details for Type B barrier (SBC) and includes instructions on how to use the strip seal gland, which is not shown for clarity. The drawing is part of a larger set of plans for the Missouri Highways and Transportation for the Construction No. 1888 – Ask MODOT (1-888-275-6636).
