Safe and Efficient Vehicular Travel Through Corridor in 2050

- 25% Decrease in Delays*
- 41% Decrease in Stops*

*Compared to No-Build

Low volumes
Speeds restricted by travel
Speeds and maneuverability
with no delays.
Conditions, minor delays.
Speeds and maneuverability
Closely controlled because of higher volumes
Speeds considerably affected by change in operation conditions. High density traffic restricts maneuverability; volume near capacity
Cow speeds; considerable delay;
Very low speeds; volumes
Very low speeds; volumes
volume at or slightly over capacity
with stop-and-go traffic
