

Description

The proposed interchange would provide access to south Scott City, as well as a connection from Interstate 55 to Kelso. Additionally, the project would relieve congestion at the Route 61/K/M/I-55 interchange.

Timeline

Funding for the project has been secured, and the project was added to the Statewide Transportation Improvement Program. The project is currently in the location and design approval phase. Right-of-way acquisition is expected to occur in 2015 through 2016, with the project let in early 2017.

Proposed Design

The proposed project includes constructing approximately 4,000' of new roadway from Route 61 at Kelso to the existing Route PP overpass bridge. Approximately 7,500' of new outer road east of Interstate 55 will be needed to connect to County Road 311, as well as improvements to the remaining portion of County Road 311 to Scott City. The Route PP bridge will be widened to accommodate turning movements for the new interchange.

Contact Information

For more information, please contact Project Manager Eric Krapf at (573) 472-5261, Transportation Project Designer David Blalock at (573) 472-5295 or MoDOT's Customer Service Center toll-free at 1-888-ASK MODOT (275-6636). Information is also available online at www.modot.org/southeast.
