**SECTION (1):
GENERAL DESCRIPTION AND BACKGROUND**

(A) Request for Proposal: This document constitutes an RFP from qualified organizations to conduct the TR202117 “**Asset Management for Mobility and Intelligent Transportation Systems**” study for the MHTC and Missouri Department of Transportation (MoDOT).

(B) Background: In the United States, Moving Ahead for Progress in the 21st Century, better known as MAP-21, introduced “asset management” into the lexicon of state Departments of Transportation (DOTs), or at least made it more widely known in understanding and practice. In MAP-21, state DOTs were required to provide asset management plans for pavements and bridges. In doing so, each State was required to develop a risk-based asset management plan; “a systemic process of operating, maintaining, and improving physical assets with a focus on engineering and economic analysis based upon quality information, to identify a structured sequence of maintenance, preservation, repair, rehabilitation, and replacement actions that will achieve and sustain a desired state of good repair over the lifecycle of the assets at minimum practicable cost” (23 U.S.C. 101(a)(2), MAP-21 § 1103).

While encouraged, the inclusion of all infrastructure assets, including mobility and intelligent transportation systems (ITS), was not required in MAP-21. These assets include, but are not limited to Dynamic Message Sign (DMS) boards, cameras, wireless radios, sensors/detectors, ramp meters, advanced traffic controls, and Road Weather Information Systems (RWIS) stations. With the benefits of asset management plans for pavements and bridges being realized for better understanding of a DOT’s system and the financial planning involved in making those plans a reality, it is easy to understand that similar efforts could greatly enhance awareness of and promote economical and sustainable “good repair” of traveler mobility and ITS assets. With transportation budgets consistently strained to cover a gamut of aging and critical infrastructure assets across concentrated urban and far-reaching rural environments, designating a steady flow of funding for the management of these devices and assets remains a challenge. On top of that, as ITS and traveler mobility options vary so widely from state-to-state, and in many cases within a state, it is difficult compare the level of management efforts and action for these assets.

The primary objectives of this research include the following:

- Conducting a literature review to see how other state DOTs, the Federal Highway Administration (FHWA) and other related organizations or agencies currently manage or recommend undertaking the management of traveler mobility, ITS and related structural and telecommunications infrastructure.
- Synthesizing the results of the literature review and providing recommendations based off the findings and gained understanding of MoDOT’s current environment and methods for managing these types of assets.
- Develop a spreadsheet/tool to aid MoDOT in managing mobility and ITS assets.

(C) Fiscal Year: MoDOT’s fiscal year runs from July 1-June 30.

(D) Contract Period and Budget: The contract period will run for 11 months. The contract budget must not exceed \$75,000, as stipulated in Section (2)(A). Please note, a cost estimate

shall be submitted as part of the proposal (see Section (3)(D)) and will be considered during the evaluation process.

(E) RFP Schedule: The following RFP Schedule of Events represents MoDOT’s best estimate of the schedule that shall be followed. The time of day for the following events shall be between 7:30 am and 4:00 pm, Central Standard Time. MoDOT reserves the right at its sole discretion to expand this schedule, as it deems necessary, without any notification except for the deadline date for submitting a proposal.

Proposals need to include a work plan with a proposed timeline. While alternative timelines will be considered, an extension is unlikely. The project timeline will be finalized during the contracting phase.

These quarterly updates shall be submitted electronically to the MoDOT project manager. These updates are the basis for information in the Statewide Planning and Research (SPR) Quarterly Report that the Construction and Materials Division submits to FHWA at the end of each quarter of the fiscal year. The quarterly reports are not intended to replace any additional correspondence between the research team and MoDOT needed to keep the project moving. Please refer to template on the [website](#).

SECTION (2): SCOPE OF WORK

(A) Services: The successful Offeror shall provide the following services not to exceed \$75,000. The Offeror shall provide an overall synthesis of studies and surveys that explore, illustrate and describe best practices and methods for asset management of mobility and ITS assets. In addition, as the synthesis progresses, the Offeror will remain available to respond to questions and concerns raised by the project's Technical Advisory Committee (TAC). The following tasks shall be completed and are intended to provide guidance in development of this research.

(B) Specific Requirements: The Offeror will provide to Construction and Materials an electronic copy of a program proposal which will help bring the project to its successful completion.

Task 1

Project Management

The Contractor will facilitate a kick-off meeting with MoDOT to review the work plan, scope and schedule; and establish a protocol for regular ongoing communications and coordination with the team. The contractor will also develop minutes for the kick-off meeting and any status meetings that may be held during the project.

A list of the types of devices, structures, systems or other specific assets or groupings thereof that should be considered while carrying out the following tasks should be completed during the kick-off meeting.

The finalized work plan will detail implementation of the following tasks as well as the resources and schedule required to carry them out.

Task 2

Conduct Literature Search

The Contractor will conduct a robust literature review. The topics important in this review include, but are not limited to, the following:

- Industry best practices with regards to asset management;
- Manufacturer's suggested life cycles or industry standards for replacement;
- State DOTs asset management plans for similar systems/asset types;
- FHWA and/or USDOT recommendations and suggestions;
- Advancements in asset and system technologies, and how those are affecting cycles;
- Financial and/or budgetary analysis highlighting funding forecasts and managing assets in the short- and long-term.
- Use of contract vs. internal forces to accomplish replacements, upgrades, etc.;
- Documentation and examples for calculating budgets and/or funding requirements; and,
- Inspection life cycles of significant structures, such as trusses for signs and high mast arms for lighting.

The Contractor will consult the TAC during the first two (2) Monthly Updates to determine if any additional topics identified in the initial stages of the Literature Search are of high priority to the TAC/MoDOT and warrant additional attention.

Task 3

Survey State DOTs

The Contractor will draft a survey for state DOT personnel who are involved in mobility systems/ITS and/or asset management, to highlight and understand current practices across the nation. Prior to disseminating the survey, the Contractor will provide an opportunity for TAC review and input.

Task 4

Synthesize the Findings of the Literature Search and Provide Recommendations

The Contractor will, using the findings from Task 2, synthesize the information gathered and provide recommendations based on perceived trends and noted best practices. The synthesis and recommendations will be formally presented in the Synthesis Report, but may be discussed/presented to the TAC during the creation of the Asset Management Tool.

Task 5

Develop an Asset Management Tool for Mobility and ITS Assets

The Contractor will develop an easily accessible and user-friendly Asset Management Tool based on the findings from the synthesis. The tool will aid MoDOT Districts/TMCs in quantifying assets, identifying adequate replacement/maintenance schedules, and financial/budget requirements.

The Contractor will be proactive in scheduling meetings and facilitating discussions with the TAC and MoDOT Research, in order to understand the needs of the Department prior to and as the tool is being developed.

Task 6

Develop Draft Synthesis Report and Research Summary
