Missouri Department of Transportation

Toolbox Shelf

Description

The Toolbox Shelf is an added shelf in a standard toolbox that keeps tools separate from chains. The toolboxes that come with fleet trucks are a wide open box with no shelving. The added shelf has increased organization, efficiency and safety since it eliminates the need to dig for the small tools stored in the toolboxes.

Benefit

The Toolbox Shelf simplifies work, improves safety and saves time.

Materials and Labor

Materials: \$30 for shelves made by a local fabricator, gray primer and black spray paint.

Labor: 8 hours
