**RE: Letter of Interest – Environmental**

Designing and maintaining a safe and efficient transportation system for the citizens of Missouri is a goal we share with you and our local agency partners. For 93 years, Wilson & Company, Inc., Engineers & Architects (Wilson & Company) has been serving city, county, state, and federal agencies with their environmental needs ranging from environmental clearance and permitting to wetland delineations and hazardous materials reviews. We bring to you a team of subject matter experts (SMEs) proficient in a wide variety of areas including National Environmental Policy Act (NEPA) compliance, wetland biology, hazardous waste management, archaeology, historical architecture, biology/wildlife, habitat assessments, noise studies, and water quality permitting. Our environmental professionals have completed the types of tasks required for the environmental needs of the Local Public Agencies (LPAs) contract.

**Wilson & Company is current in all MoDOT prequalification categories required to provide environmental services.**

## General experience

Wilson & Company has a very productive and rewarding history of working with local cities, counties, and various state and federal agencies across the nation. The environmental services team works with each discipline in our firm to provide innovative and cost-effective solutions to often very complex environmental clearance and permitting processes. Our multidisciplinary firm has a strong understanding of alignment studies, transportation planning, roadway design, traffic studies, safety analysis, signalization, drainage master planning, and public involvement and outreach. These skills effectively support our environmental services delivery for our clients. We also work closely with our in-house surveying, mapping, and aerial imagery experts to utilize modern techniques in resource data review. Wilson & Company's environmental services team provides diverse experience matching the requirements and needs of modern transportation projects. In an ever-changing environmental climate, our clients rely on our technical capabilities and regulatory knowledge to produce thorough and reliable documents. Wilson & Company has developed a technical team of SMEs with diverse environmental qualifications and experience completing NEPA services.

## Past performance

Wilson & Company's team has completed the following relevant projects over the years.

| Project   | Description   |
|---|---|
| Belvidere North Bridges, Thayer County, NE                                    | Prepared the NEPA Categorical Exclusion (CE) document for the replacement of three bridges and pavement reconstruction. Performed wetland delineation field surveys and assisted with other environmental resource surveys and reviews.   |
| Markey Parkway, City of Belton, MO  | NEPA CE documentation preparation for the extension of Markey Parkway. Conducted resources surveys including cultural resources documentation, noise analysis modeling, environmental resources analysis, and wetland delineation.  |
| Katy Depot to Liberty Park Connect Sedalia Trail Project, City of Sedalia, MO | NEPA PCE documentation and preparation. Conducted all necessary resource surveys including cultural resources, wetland delineation, Section 4(f)/6(f) consultation, and threatened and endangered species documentation.  |
| Douglas Street - Blue Parkway to 4th St, Lee's Summit, MO                     | NEPA PCE documentation preparation for the reconstruction of Douglas Street from Blue Parkway to 4th St. Conducted resources surveys including cultural resources documentation, environmental resources analysis, preparation of environmental resources analyses and technical reports. |

| Project   | Description  |
|---|--|
| OTO - South Creek Trail<br>Posenke Gap, Springfield, MO | NEPA PCE documentation preparation. Conducted resources surveys including cultural resources documentation, environmental resources analysis, wetland delineations, and preparation of environmental resources analyses reports. |
| Kaysinger Basin Bridge Bundle,<br>MoDOT SW District, MO | Conducted cultural resources and wetland delineations and PCE documentation on 25 bridges throughout the SW region rural Missouri.   |

### Qualifications of personnel

**Chris Wilkinson III, PWD**  
**Contract/Project Manager**

Chris is the environmental practice lead for the Midwest Region. His experience includes project management, scientific and technical report preparation, and submittal; as well as preparing and submitting NEPA EA, CE, and programmatic categorical exclusion (PCE) documents. He has extensive experience in Clean Water Act (CWA) Section 404/401 wetland and stream delineation, regulatory permitting, mitigation, and restoration, involving federal, state, and local regulatory agencies. Chris has completed DOT projects in MO, NE, NM, MD, and VA.

**Anahita Behrad**  
**NEPA Lead**

Anahita is an accomplished environmental leader with expertise in environmental planning, NEPA documentation, and other environmental regulations and permitting for local and regional projects. With over 17 years of experience working with DOT clients, Anahita understands the resource criteria included in the DOT NEPA evaluation process and has helped her clients prepare legally defensible NEPA documentation. Anahita excels in delivering complex projects on time and within budget and has a proven ability to encourage stakeholder collaboration and lead multidisciplinary teams of engineers, planners, and scientists.

**Michelle Stryker, MCP3**  
**NEPA Specialist**

Michelle is an experienced environmental project manager specializing in environmental planning, agency coordination, and compliance with the NEPA and related regulations. For over 23 years, she has worked closely with the FHWA, preparing more than 80 CE documents for Nebraska’s Recreational Trails Program. Her expertise includes managing projects

involving Section 6(f) properties and addressing issues related to threatened and endangered species. Michelle is highly skilled in fostering collaboration among local, state, and federal agencies. Throughout her career, she has authored environmental assessments for the Bureau of Reclamation, environmental impact statements for state park initiatives, and comprehensive park planning documents. She has also led public engagement efforts involving thousands of stakeholders, ensuring inclusive and transparent planning processes.

**Peter Steele, RPA**  
**NEPA/Cultural Resources Specialist/Noise**

Peter has 16 years of experience helping federal, state, and local agencies comply with NEPA both as a consultant and as an agency employee. His career has been largely focused on transportation, with projects ranging from CEs to EISs for the DOTs in Missouri, Nebraska, Utah, Colorado, Idaho, Montana, Nevada, Arizona, and New Mexico. With subject matter expertise in archaeology, historic architecture, and noise analysis, Peter understands the entire environmental process from planning and scoping through public involvement and mitigation of adverse effects. Peter has been a major author, environmental lead, or project manager for 17 EAs (of which nine are with a DOT) and six EISs (of which four are with a DOT).

**Grace Harwin**  
**NEPA Specialist**

Grace is experienced in environmental consulting and regulatory compliance. She specializes in biological assessments, NEPA documentation, and Endangered Species Act compliance, with extensive experience involving threatened and endangered species surveys, habitat evaluations, and Section 7 consultations. Grace has conducted detailed biological assessments and environmental assessments for complex infrastructure and telecommunications projects across multiple states and tribal jurisdictions.

**Jonathan Coffey, RPA**  
**Cultural Resources**

Jonathan is an experienced archaeologist with diverse interdisciplinary skills, including applied archaeology spanning from the midwest and southeastern U.S. to the Arctic, as well as additional multi-year experience in environmental remediation and geospatial analysis. He has worked in all aspects of project management, including field investigation of archaeological sites and historic properties, geospatial support, and report preparation for state and federal compliance. Jonathan is skilled in database management, archival research, staff supervision, and photography. He meets the Secretary of the Interior's Professional Qualification Standards in archaeology and abides by all ethical standards set forth for professional archaeologists.

**Josh Carpenter**  
**CWA Permitting/Biology**

Josh brings over 22 years of experience in CWA Section 404 permitting, NEPA compliance, and interagency coordination. He is well known for his strong working relationships with regulatory agencies and his ability to guide complex environmental projects to completion. His expertise spans project management, ESA and Section 106 consultation, alternatives analysis, and environmental impact evaluation. Josh has supported a wide range of transportation, utility, and stream restoration projects, including stream stabilization and wetland/stream mitigation efforts. His regulatory knowledge and practical field experience help make sure projects meet all environmental requirements and are delivered on schedule and within scope.

**Nick Kronshage**  
**Wetland Biologist**

Nick has delineated several thousand acres across multiple regions and states and has completed CWA 404 permitting and CWA 401 state permitting requirements. He has worked with several state DOTs to deliver NEPA EA, CE, and other necessary permitting. Nick also has experience in environmental compliance, completing Phase I ESAs, HASP, Noise Studies, and MS4.

## Familiarity/Capability

Our team has a long and successful history of responding to on-call projects from a diverse client base throughout the Midwest. Our strengths include experienced staff members, local area expertise, and extensive knowledge in performing a variety of projects for federally funded agencies. Wilson & Company's environmental services staff has been awarded three on-call DOT contracts for environmental services in the region which includes NEPA documentation; farmland; biological assessment; hazardous material review; Section 4(f)/Section 6(f); wetland delineation; and Section 404 permitting. Many of our transportation projects in Missouri, including the Improve I-70 Project 2 DB Program Management, SW Kaysinger Bridge Bundles Owner's Engineer, and the City of Belton's Markey Parkway project required environmental clearances and permits. Our ability to respond quickly and efficiently to provide quality environment permitting services and the associated documents is the reason we have a long and successful history of selection for on-call contracts.

## Accessibility

We know on-call assignments are often associated with short schedules and tight budgets, requiring immediate responses and efficient execution. By selecting Wilson & Company, you will receive a talented, responsive team, supported by a firm of diverse SMEs. We are fully aware that public funds are limited and need to be allocated wisely, and Wilson & Company brings a superior value to our public agency partners. We will commit the necessary staff and resources to successfully complete projects issued through this on-call contract and will maintain the same quality staff over the term of the agreement. Key members assigned to this on-call will be available for the duration of this contract. These individuals are located in our Missouri, Arizona, Utah, New Mexico, Nebraska, and Colorado offices.

Sincerely,

Chris Wilkinson III, PWD

# Our Purpose

We bring people together to practice their craft, to create value, and to accomplish great things.

Since 1932, Wilson & Company provides clients with award-winning engineering, alternative delivery, construction, survey & mapping, planning, environmental, architecture, funding, and utility inspection coordination services.

## Shared Ownership

We focus on your specific needs to deliver excellence with lasting Higher Relationships in mind. Employing our core values of discipline, intensity, collaboration, shared ownership, and solutions, we create genuine experiences and lasting connections. Because of this, clients have relied on Wilson & Company to help them move from concept to completion, unused spaces to productive places, underutilized to efficient facilities, and rural to urban challenges to achievable solutions.

## Committed to Safety

At Wilson & Company, safety isn't just a priority, it's a commitment. From the field to the office and beyond, we prioritize the well-being of our employees, clients, and communities, fostering a culture where safety awareness extends to every facet of their lives.

## Mindful Stewardship

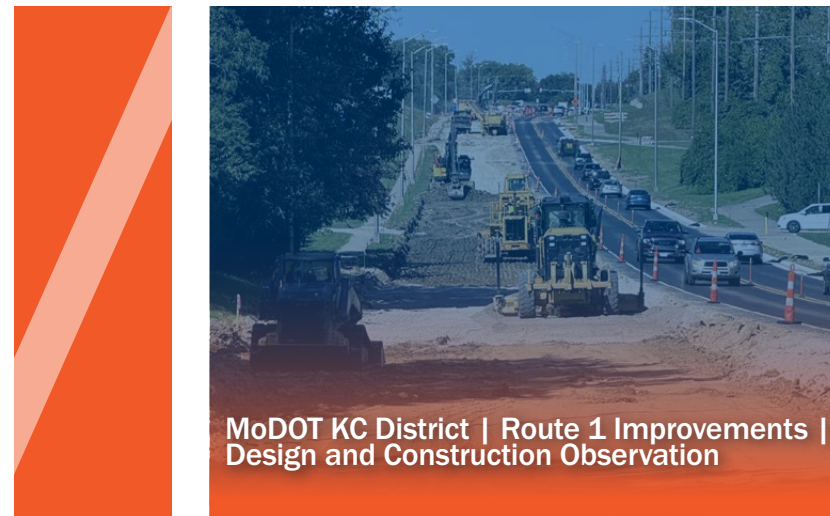

As we practice our craft, we seek opportunities to provide long-term sustainable solutions, enhance our communities, and promote responsible use and conservation of our resources.

## Wilson & Company, Inc., Engineers & Architects

Our firm has brought together more than 850 people across 17 locations in nine states to build Higher Relationships through discipline, intensity, collaboration, shared ownership, and solutions with our clients, partners, and communities. After more than nine decades of business, professionals continue to hone their craft with us, including civil, mechanical, electrical, and structural engineering; architecture; planning; biology; surveying; mapping; GIS specializations; drone piloting; financial analyses; program management; construction administration, materials testing, and inspection; and a growing number of multi-disciplinary specialties. We strive to create value for a diverse client base, encompassing federal and municipal governments, public transportation agencies, railroad companies, industrial and commercial corporations, and private developers.

Over the years, Wilson & Company has provided services connecting communities, businesses, and commerce. We have made transportation and infrastructure safer, erected facilities that enhance the function of society, and detailed exhibits necessary to provide sound engineering solutions.

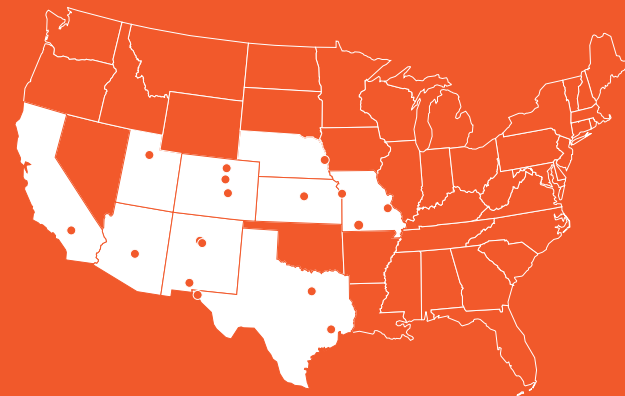

### Approach to Quality

Wilson & Company emphasizes and promotes success in the workplace for everyone. We strive to provide quality projects to our clients. We work with you to understand your goals and take shared ownership to help align our delivery with your needs. We have developed multiple facets of our quality management program to build project-specific quality management plans. We include quality control checks and quality assurance reviews of the quality documents to confirm conformance with the procedure. We go above and beyond by including interdisciplinary reviews, where applicable, to make sure all deliverables between our various crafts are coordinated. We also bring a fresh perspective to projects that have potential for value engineering through the use of independent quality reviews. Our team includes people with diverse backgrounds and different perspectives, and we use that to enrich our company and deliver successful projects to our clients.

## Our Services

### Engineering

- ADA compliance reviews
- Bridge & structure
- Design-build
- Design-build owner's engineer
- Energy - oil, gas, chemical, midstream, & pipeline
- Federal
- Flood control
- Hydraulics
- Infrastructure
- Interchanges
- Intersection
- Land development
- Levee & dam
- Mechanical & electrical
- Parks & recreation
- Pedestrian facilities
- Power distribution
- Public works
- Railroad
- Roadway lighting
- Storm water quality
- Traffic ITS management & design
- Traffic safety
- Traffic signal design
- Transportation - highway, street, & transit
- Traffic & parking
- Urban drainage
- Utility infrastructure services
- Value engineering
- Visualization modeling
- Watershed
- Water, wastewater, & reuse

### Construction

- Code enforcement
- Construction administration
- Construction observation
- Program management
- Special inspections
- Testing
- Vertical & horizontal observation

### Survey & Mapping

- Aerial photo control
- Bathymetric
- Cadastral, boundary & ALTA surveys
- Construction surveys
- Data collection
- Digital aerial imagery
- Digital orthophoto production
- Digital terrain models
- Emergency response
- Engineering design surveys
- GIS services
- Lidar remote sensing; aerial & mobile
- Planimetric & Photogrammetric services
- Right-of-way mapping & easement
- sUAS aerial imagery acquisition
- Survey control
- Terrestrial lidar
- Topographic mapping & digital terrain models

### Planning

- Bicycle & pedestrian
- Environmental
- Educational facility sites
- Funding assistance
- Funding grant assistance
- Housing
- Land entitlements
- Ordinance development
- Plan & program development
- Program prioritization
- Residential, commercial, & industrial development
- Safety
- Stormwater
- Transit
- Transload
- Transportation
- Water, wastewater, & reuse
- Zoning

### Environmental

- Environmental assessments & remediation
- Real estate - environmental due-diligence
- NEPA studies, natural resources, & permitting
- Urban redevelopment, land clearing, & brownfields

### Architecture

- Accessibility compliance
- Bidding services
- Building measurement
- Construction defect analysis
- Design
- Facility assessments
- Facility & master planning
- Furniture, furnishings, & equipment design
- Interior design
- Programming
- Renderings & 3D illustrations
- Site evaluation & planning
- Space planning
- Zoning process assistance

## Beyond Engineering

Philanthropic and volunteer work are essential to Wilson & Company's culture. Since 2010, our organization has donated nearly \$300,000 to organizations that impact our communities. In 2025, Wilson & Company and its employees raised more than \$75,000 for local nonprofit organizations that support a range of causes, including service dog programs for veterans, local food banks, affordable housing initiatives, and more. Our employees know success is when we improve the communities in which we live and work.
