Wing Plow Securer

Description
A half of a steel washer is welded to a wing plow cylinder.

Benefit
The washer attachment keeps the wing plow from bleeding off and lowering while not in use. The securer also makes attaching and detaching the chain faster and safer.

Parts and Labor
Total: 50 cents
Labor: 30 minutes

For More Information
1 ¼” Flat Washer.

1. Cut washer as shown above, this will make 2 Chain stops.
2. Weld washer 9” up from bottom of push arm.
