

Project Description:

The project will involve a bridge replacement at the Gasconade River on Route H, west of Manes. A new two-lane structure will replace the existing single lane bridge.

Traffic:

To complete the bridge replacement over the Gasconade River, it will be necessary to close the bridge. The closure will last approximately 60-75 days and will occur June-July of 2012. A detour will be signed during this time (**see back**).

Current Single Lane Bridge

Timeline:

The project is expected to be awarded by the Missouri Highways and Transportation Commission in April 2012. If the project is awarded at that time, work is expected to begin mid May 2012 with completion anticipated early August 2012.
