The initial site approval of your proposed sewage treatment and disposal system was accomplished on
8-31, 2015.

[X] Your site and plans have been approved for construction to begin.

Twenty-four hours before any construction begins you must contact the Environmental Health Services to arrange an inspection of your system.

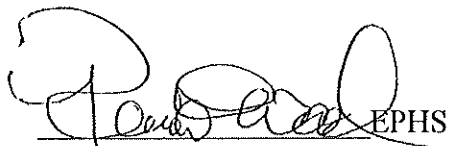

Comments:

The following must be accomplished to complete your site sewage system permit fill:

- ☐ Complete legal description with Quarter(s), Section, Township, and Range
- ☐ Diagram of proposed sewage system with all structures on the site (wells, trees, surface waters, ditches, buildings, etc) and all setback distances.
- ☐ Soil evaluation must be performed prior to installing any septic system. Make sure our office has the results before you begin construction.
- ☐ Other
Final inspection must be accomplished prior to completion and/or use of your sewage system.

Operation of a on-site sewage system without a permit IS a violation of Callaway County Ordinance # 701.

Your cooperation is appreciated

 EPHS
