4. Definitions and Terms

- 4.1 Clean fill is “uncontaminated soil, rock, sand, gravel, concrete, asphaltic concrete, cinder blocks, brick, minimal amounts of wood and metal and inert (nonreactive) solids for fill, reclamation or other beneficial use”.
- 4.2 Minimal means “the smallest amount possible”. For example, concrete containing wire mesh or reinforcing rods (rebar) may be used for clean fill if you remove the exposed rebar before use.
- 4.3 Recovered material are those materials “removed from the waste stream for reuse or to be made into new products”. Potentially recoverable materials include clean fill as well as metals, paper, cardboard, asphalt shingles, sheet rock, concrete, lumber and other wood waste, glass, electrical wire, plastics, organics and many others.

5. Specific Requirements

- 5.1 All work shall be accomplished in a safe manner in accordance with the Missouri Standard Specification for Highway Construction and OSHA standards.
- 5.2 The material processed consists of concrete slabs that have been removed from a roadway or bridge during repair operations. The concrete slabs are of varying size and shape. The slabs contain wire mesh and rebar.
- 5.3 The intent of this RFB is to solicit the services of a contractor to crush the slabs and remove the steel wire mesh and reinforcing steel such that the crushed materials can be used as clean fill. The steel removed in the crushing process is to be retained by the contractor for proper disposal.

- 5.12 The MHTC reserves the right to inspect the work site covered by this bid, verify quantities and review operations at any time without advance notification to the Contractor.

6. Measurement

- 6.1 Measurement for all reclaimed concrete shall be by the cubic yard as determined by a measurement of the gradation piles by the MHTC and calculation of the cubic yards of material in each pile.
- 6.2 The estimated amount of concrete slabs to be reclaimed under this contract is shown on the individual price sheet, but not guaranteed. The unit price on the individual bid schedules will be used for payment based on the actual pile measurement and cubic yard calculation.
- 6.3 The Contractor may be requested to crush more or less than the estimated quantity of concrete slabs shown on the price sheets.
- 6.4 MHTC reserves the right to limit the total amount of reclamation quantities to 150% of the estimated amount of slabs shown on the pricing sheets.

7. Performance Schedule

- 7.1 The Contractor shall commence contract performance within five (5) working days of receipt of Notice to Proceed. Prior to commencing the on-site concrete slab crushing operations in each District, the Contractor shall, with the MHTC's direction, provide a DISTRICT WORK PLAN showing where operations will begin. The plan shall be updated if changes are made in the operations plan. Work cannot be started until the MHTC has issued a notice to proceed for the work.
- 7.2 **District Work Plan:** The Contractor will submit a District Work Plan that describes the method, equipment, anticipated production rate and completion date of the work for the District where the work is being performed. Information from the District Work Plan will be used to determine what, if any, liquidated damages will be assessed for not completing the work in the District as approved in the District Work Plan. Should the original amount of concrete slab material be increased or decreased in a given District, the District Work Plan will be updated by the Contractor and MHTC to reflect possible changes to the completion date for that work.
- 7.3 **Minimum Production Rate:** At a minimum, the Contractor's Work Plan will outline a crushing operation that meets the requirements of this contract that can produce a minimum rate of 100 cubic yards per day, or at a rate approved by the MHTC.
- 7.4 All activity associated with slab crushing operations shall be performed during normal working hours of 7:00 am to 5:00 pm, local time, unless an alternate work schedule is approved by the MHTC.

- 10.2 No extra work shall be done or any obligation incurred except upon written order by the MHTC. If any change causes an increase or decrease in the Contractor's cost of, or the time required for, the performance of any part of the work under this contract, the MHTC shall make an equitable adjustment and modify the contract in writing through the use of a supplemental to the contract.
- 10.3 The MHTC reserves the right to direct additional services not described in the bid document as changed or unforeseen conditions may require. Such direction by the Commission Representative shall not be a breach of this Agreement. In this event, a supplemental agreement will be negotiated and executed prior to the Contractor performing the additional or changed services, or incurring any additional cost therefore.
