2013 Year in Review

1. **The westbound Interstate 70 Blanchette Missouri River Bridge** was reopened to traffic in August, more than two months ahead of schedule. The \$64 million rehabilitation removed the majority of the bridge and then completely rebuilt and reopened it with minimal traffic delays.
2. **The Interstate 64 Daniel Boone Missouri River Bridge** started construction in January 2013. Crews spent the bulk of the year working in the river building the substructure foundations. By the end of 2013, the first girders were being placed. The new eastbound bridge will open in late 2014 with full project completion at the end of 2015.
3. **The Route 364 Page Phase 3** contract was awarded to February 2013 and construction began in May. Two bridges have already opened in the first year with completion on schedule for fall 2014.
4. **The I-70/Mid Rivers Mall Drive interchange** was rebuilt as a diverging diamond with construction starting in the spring and completion in early December.
5. **Route 61** was resurfaced from the County line to I-70.
6. **Safety shouldering work** was completed on Route Z, and started on Routes D and DD.
7. **I-70**— MoDOT is working with the county and local cities on corridor improvements

After one year of construction on the new Boone Bridge, the foundations are nearly complete and the first bridge girders have been placed.

The Mid Rivers Mall Drive and I-70 interchange was dedicated November 7,
