MoDOT Leadership

Director - Pete Rahn

The **director** is the chief executive officer for the Missouri Department of Transportation and is appointed by the Missouri Highways and Transportation Commission. Pete Rahn leads more than 6,000 employees who are responsible for providing a world-class transportation experience that delights its customers and supports a prosperous Missouri. MoDOT operations include 32,000 miles of highways and the state support of aviation, rail, transit, and water ports.

Prior to a legislative change in 1998, the top leadership position within the department was the chief engineer.

Chief Engineer - Kevin Keith

As the key assistant to the MoDOT director, the **chief engineer** has input on overall department decisions at the Missouri Department of Transportation as well as overseeing engineering operations such as transportation planning, construction and maintenance. This position reports directly to the director and serves as the primary advisor regarding engineering and business issues. The chief engineer handles MoDOT's day-to-day operations.

Accountability legislation passed in 1998 created the position of director as the chief administrative officer for the department. Prior to that change, the chief engineer was the top executive at MoDOT.

Chief Financial Officer - Roberta Broeker

The department's **chief financial officer** manages the System Facilitation Team, whose role is to help the System Delivery team achieve its tangible results.

Equal Opportunity and Diversity, Information Systems, Human Resources, General Services, Resource Management, the Controller's Division and Risk and Benefits Management make up the System Facilitation team. The chief financial officer reports to the MoDOT director.
